EREZTECH LLC

SAFETY DATA SHEET

Section 1. Identification

Product Name: [Lithium borohydride](#)
Product Type: Solid
CAS Number: 16949-15-8
Product Number: LI9158
Recommended Use: Laboratory chemicals, synthesis of substances.
Product Manufacturer: Ereztech LLC
11555 Medlock Bridge Road, Suite 100
Johns Creek, GA 30097
Product Information: (888) 658-1221
In Case of an Emergency: CHEMTREC: 1-800-424-9300 (USA);
+1 703-527-3887 (International); CCN836180
*** Contact manufacturer for all non-emergency calls.

Section 2. Hazards Identification

Hazards Identification

Classification: SUBSTANCES AND MIXTURES WHICH, IN CONTACT WITH WATER, EMIT FLAMMABLE GASES – Category 1, H260
ACUTE TOXICITY, ORAL – Category 3, H301
ACUTE TOXICITY, DERMAL – Category 3, H311
SKIN CORROSION/IRRITATION - Category 1B, H314
SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1, H318
ACUTE TOXICITY, INHALATION – Category 3, H331
SPECIFIC TARGET ORGAN TOXICITY, SINGLE EXPOSURE;
RESPIRATORY TRACT IRRITATION – Category 3, H335

GHS Label Elements

Hazard Pictograms:

Signal Word: DANGER
Hazard Statements: H260: In contact with water releases flammable gases which may ignite spontaneously.
H301: Toxic if swallowed.

Lithium borohydride Safety Data Sheet

Section 2. Hazards Identification

Hazard Statements (cont.):

H311: Toxic in contact with skin.
H314: Causes severe skin burns and eye damage.
H318: Causes serious eye damage.
H331: Toxic if inhaled.
H335: May cause respiratory irritation.

Precautionary Statements

Prevention:

P223: Do not allow contact with water.
P231 + P232: Handle and store contents under inert gas. Protect from moisture.
P260: Do not breathe dusts, aerosols, vapors or gases.
P262: Do not get in eyes, on skin or on clothing.
P264 + P265: Wash hands and exposed skin thoroughly after handling. Do not touch eyes.
P270: Do not eat, drink or smoke when using this product.
P271: Use only outdoors or with adequate ventilation.
P280: Wear protective gloves/protective clothing/eye protection/face protection/hearing protection.

Response:

P301 + P316: IF SWALLOWED: Get emergency medical help immediately.
P301 + P330 + P331: IF SWALLOWED: Rinse mouth. Do not induce vomiting.
P302 + P335 + P334: IF ON SKIN: Brush off loose particles from skin and immerse in cool water.
P302 + P352: IF ON SKIN: Wash with plenty of water.
P302 + P361 + P354: IF ON SKIN: Take off immediately all contaminated clothing. Immediately rinse with water for several minutes.
P304 + P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P305 + P354 + P338: IF IN EYES: Immediately rinse with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P316: Get emergency medical help immediately.
P330: Rinse mouth.
P361 + P364: Take off immediately all contaminated clothing and wash it before reuse.
P363: Wash contaminated clothing before reuse.
P370 + P378: In case of fire: Use dry sand, dry chemical powder, or CO₂ for extinction.

Storage:

P402 + P404: Store in a dry place. Store in a closed container.
P403 + P233: Store in a well ventilated place. Keep container tightly closed.
P405: Store locked up.

Lithium borohydride

Safety Data Sheet

Section 2. Hazards Identification

Disposal:	P501: Dispose of contents/container in accordance with federal, state and local regulations.
OSHA/HCS Status:	This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Hazards Not Otherwise Classified (HNOC):	Reacts violently with water to release hydrogen gas and diborane.

Section 3. Composition/Information on Ingredients

Substance Type	: Mono-constituent.
Synonyms	: Lithium borohydrate; lithium boranate; lithium boron; lithium tetrahydroborate.
Formula	: LiBH_4
Molecular Weight	: 21.77 g/mol.
EC No.	: 241-021-7

Component Name	%	CAS Number
Lithium borohydride	≥ 98	16949-15-8

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First Aid Measures

Description of Necessary First Aid Measures

General Advice:	Move out of dangerous area. Get immediate medical help. Show this safety data sheet to the doctor in attendance. If unconscious, place in recovery position and get medical help immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Eye Contact:	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Rinse for a minimum of 15 minutes. Check for and remove any contact lenses after initial rinse period and continue rinsing for an additional 15 minutes. Keep eyes wide open during rinsing process. Get immediate medical help.
Skin Contact:	Remove all contaminated clothing and shoes. Wash off contaminated skin with plenty of water for a minimum of 15 minutes. Thoroughly clean and dry contaminated clothing before reuse. Destroy/discard contaminated shoes. In the event of complaints or symptoms, avoid further exposure. Get immediate medical help.

Lithium borohydride

Safety Data Sheet

Section 4. First Aid Measures

Inhalation: Get emergency medical help immediately. Rescuer should wear a mask or self-contained breathing apparatus if it is suspected that fumes or gases are still present. Remove person to fresh air and keep comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Do not use mouth-to-mouth method if victim ingested or inhaled the product; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device.

Most Important Symptoms/Effects, Acute And Delayed Potential Acute Health Effects

Eye Contact: Product causes serious eye damage. Symptoms may include watering, redness, pain, swelling of the eyelids, inability to keep eye open, blurred vision and temporary/permanent loss of vision.

Inhalation: Product reacts violently when exposed to moisture/water and may be expected to be corrosive to mucous membranes and tissues of the upper respiratory tract. Symptoms may include a burning sensation, coughing, coughing up blood (hemoptysis), wheezing, laryngitis, shortness of breath/ difficulty in breathing (dyspnea), blueness (cyanosis) of lips and skin, nausea, headaches, disorientation, general weakness and loss of consciousness. Diborane produces toxic bronchopulmonary effects.

Skin Contact: Skin contact with this product may be expected to cause chemical burns and possible toxic effects similar to inhalation and ingestion. Symptoms may include reddening of skin, a burning or itching sensation, pain, blistering and tissue necrosis.

Ingestion: B R Compounds released when product is exposed to moisture/water may be expected to be corrosive to mucous membranes and tissues of the mouth, esophagus and digestive tract. Symptoms may include pain when swallowing (odynophagia), difficulty swallowing (dysphagia), fever, nausea, tremors, convulsions, recurrent vomiting (emesis) and vomiting of blood (hematemesis). Severe burns which may be accompanied by perforation of the esophagus and stomach may present additional symptoms of abdominal pain/rigidity, chest and/or back pain. Borate poisoning causes nausea, vomiting, diarrhea and abdominal pain. Lithium in large doses can cause dizziness and weakness with additional central nervous system symptoms of slurred speech, blurred vision, numbness, incoordination and convulsions.

Chronic Symptoms: Chronic exposure may produce bronchial irritation with cough and frequent attacks of bronchial pneumonia, dermatitis and/or conjunctivitis and respiratory distress. Gastrointestinal disturbances may also be seen.

Indication of Immediate Medical Attention and Special Treatment Needed, If Necessary

Notes to Physician: Treat symptomatically.

Lithium borohydride Safety Data Sheet

Section 4. First Aid Measures

Specific Treatments:	No specific treatment.
Protection of First Responders:	No action taken shall be taken involving any personal risk without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Section 5. Fire Fighting Measures

General Hazards:	Product reacts violently with water to release flammable gases which may ignite spontaneously.
Suitable Extinguishing Media:	THE MOST EFFECTIVE FIRE EXTINGUISHING AGENT IS DRY CHEMICAL POWDER PRESSURIZED WITH NITROGEN. Dry sand, graphite powder, Lith-X® powder or class D fire extinguisher may also be used.
Unsuitable Extinguishing Media:	DO NOT USE WATER OR FOAM as product reacts to produce extremely flammable vapors upon contact with water. DO NOT USE halogenated fire extinguishing agents.
Unusual Fire and Explosion Hazards:	This material reacts violently with water and compounds containing active hydrogen such as alcohols and acids to produce diborane and hydrogen gas. Vapor/air mixtures are explosive above flash point. Product runoff to sewer may create a fire or explosion hazard. Product may reignite after fire is extinguished. Gases generated in fire and after contact with water or moist air may be irritating, corrosive and/or toxic.
Product of Combustion:	Lithium oxides, borane/boron oxides. Irritating/toxic fumes and organic acid vapors may be generated during exposure to elevated temperatures or open flame.
Protection of Firefighters:	<p>Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Prevent contact with skin or eyes. Prevent the formation and inhalation of dusts, aerosols, vapors and gases.</p> <p>Eliminate all local and distant ignition sources. Move containers from fire area if process can be accomplished without risk to firefighters. To reduce the possibility of explosion, use a water spray or fog to reduce direct vapors and to cool unopened containers. Do not cut, grind, drill or weld on or near product containers (even empty) of this product because an explosion may result.</p>

Lithium borohydride

Safety Data Sheet

Section 5. Fire Fighting Measures

Protection of Firefighters (cont.): Fire-fighters should wear appropriate protection equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in a positive pressure mode.

Section 6. Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures

For Non-Emergency Personnel: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid inhalation of dusts, aerosols or gases. Provide adequate ventilation. Wear respiratory protection. Put on appropriate personal protective equipment.

For Emergency Responders: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For Non-Emergency Personnel".

Environmental Precautions: Do not allow dispersal of spilled material and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods for Containment

General: Spilled material will likely give off smoke and fumes. Ignition may occur immediately. Eliminate all local and distant ignition sources. Move containers from spill area if safe to do so. Prevent the formation and inhalation of dusts and aerosols. Avoid allowing the spilled material to get wet or using water to clean up spillages or residues. Use spark-proof tools and explosion-proof equipment. Dispose of collected spillage in accordance with federal, state and local regulations. Contaminated extinguishing material may pose the same hazard as the spilled product.

Small Spill: Collect spillage with a dry, non-combustible, binding material (e.g. dry sand, vermiculite or diatomaceous earth) and place in dry, sealed container for disposal. In the event of combustion: cover spillage with a dry, extinguishing material (e.g. dry sand, graphite powder, Lith-X® powder) and allow time for decomposition or for fire to burn out. Collect and place inert spillage in a dry, sealed container for disposal.

Lithium borohydride

Safety Data Sheet

Section 6. Accidental Release Measures

Large Spill:

Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with a dry, non-combustible, binding material (e.g. dry sand, vermiculite or diatomaceous earth) and place in dry, sealed container for disposal. In the event of combustion: cover spillage with a dry, extinguishing material (e.g. dry sand, graphite powder, Lith-X® powder) and allow time for decomposition or for fire to burn out. **DO NOT CLEAN-UP OR DISPOSE OF, EXCEPT UNDER SUPERVISION OF A SPECIALIST.**

Note: see Section 1 for emergency contact information, Section 5 for firefighting measures and Section 13 for waste disposal.

Section 7. Handling and Storage

Precautions:

Product reacts with water to release flammable gases which may ignite spontaneously; handle under a dry, inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended. Keep away from all sources of ignition – **NO SMOKING**. Prevent the formation and inhalation of dusts and aerosols. Keep container tightly sealed. Prevent contact with skin, eyes and clothing. Do not ingest. Avoid prolonged exposure. Ensure adequate ventilation.

Protective Measures:

Protect against electrostatic charges. Use explosion-proof electrical/ventilating/lighting/handling equipment. Use only non-sparking tools and equipment. Put on appropriate personal protective equipment (see Section 8). Keep in the original container kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

General Occupational Hygiene:

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking or smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Safe Storage Conditions:

Product reacts with water to release flammable gases which may ignite spontaneously; store under an inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended. Store refrigerated at 2 – 8 °C. Keep away from all sources of ignition – **NO SMOKING**.

Lithium borohydride

Safety Data Sheet

Section 7. Handling and Storage

Safe Storage Conditions (cont.): Store in original container protected from direct sunlight in a dry and well-ventilated area, away from incompatible materials and food and drink. Keep container tightly closed and sealed until ready for use. Store locked up.

Section 8. Exposure Controls/Personal Protection

Introductory Remarks: These recommendations provide general guidance for handling this product. Because work environments and material handling practices vary, safety procedures should be developed for each intended application. While developing safe handling procedures, do not overlook the need to clean equipment and conduct regular repairs. Waste from these procedures should be handled in accordance with Section 13.

Occupational Exposure Limits: Product contains no substances with occupational exposure limit values.

Engineering Controls: Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Provide an eyewash/shower station.

Environmental Exposure Controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual Protection Measures

Hygiene Measures: Avoid all unnecessary exposure. Wash all exposed skin (hands, forearms and face) thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Remove all soiled and contaminated clothing immediately. Do not inhale dusts, aerosols or gases. Prevent contact with eyes and skin. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/Face Protection: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to mists, vapors or sprays. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles, faceshield (8-inch minimum). Refer to 29 CFR 1910.133, ANSI Z87.1, or European Standard EN166.

Lithium borohydride

Safety Data Sheet

Section 8. Exposure Controls/Personal Protection

Skin Protection

Hand Protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: Chemical-resistant gloves.

Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. For full contact, use Neoprene or nitrile rubber.

Other Skin Protection:

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static, flame retardant protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.

Respiratory Protection:

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multipurpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Section 9. Physical and Chemical Properties

Physical State:

Solid (powder).

Color:

White.

Odor:

No data available.

Lithium borohydride

Safety Data Sheet

Section 9. Physical and Chemical Properties

Odor Threshold:	No data available.
pH:	No data available.
Melting Point:	280 °C (536 °F).
Boiling Point:	No data available.
Flash Point:	Not applicable (solid).
Flammability:	No data available.
Flammability or Explosive Limits	
Upper Explosive Limit (UEL):	75.6 vol. % (hydrogen in air).
Lower Explosive Limit (LEL):	4.0 vol. % (hydrogen in air).
Auto-ignition temperature:	No data available.
Decomposition Temperature:	> 280 °C (>536 °F).
Relative Density:	0.666 g/cm ³ @ 25 °C (77 °F).
Vapor Pressure:	No data available.
Relative Vapor Density:	>1 (air=1).
Water Solubility:	Reacts violently with water to produce flammable gases which may ignite spontaneously.

Section 10. Stability and Reactivity

Reactivity:	This product reacts violently with water and compounds containing active hydrogen such as alcohols and acids to produce flammable gases which may ignite spontaneously.
Chemical Stability:	This product is stable when stored under a dry, inert atmosphere and away from heat. Nitrogen containing less than 5 ppm each moisture and air is recommended.
Conditions to Avoid:	Exposure to water/moisture, sources of ignition (heat, flames, sparks, electrostatic discharges), extremes of temperature and direct sunlight.
Incompatible Materials:	Water/moisture, amines, ammonia, chloroformates, halogens, phosphorus halides, strong acids, strong bases, strong oxidizing agents.
Hazardous Decomposition Products:	Under normal conditions of storage and use, hazardous decomposition products should not be produced. In contact with water, product violently releases flammable and potentially corrosive/toxic gases. Hazardous decomposition products formed under fire conditions: lithium oxides, borane/boron oxides, and hydrogen gas. In the event of a fire: see section 5.

Lithium borohydride Safety Data Sheet

Section 10. Stability and Reactivity

Possibility of Hazardous Reactions:

Under normal conditions of storage and use noted above, hazardous reactions will not occur. Hazardous reactions or instability may occur under certain conditions of storage or use. Product reacts violently with water to release flammable and potentially corrosive/toxic gases.

Section 11. Toxicological Information

Information on Toxicological Effects

Acute Toxicity

Component	CAS No	Result	Species	Dose	Exposure
Lithium borohydride	16949-15-8	LD50 Oral	Mouse	87.8 mg/kg	-
		LD50 IP	Mouse	110 mg/kg	-
		LC50	Mammal	80 mg/m ³	-

Irritation/Corrosion

: Causes burns by all exposure routes.

Sensitization

: No specific data available.

Germ Cell Mutagenicity

: No specific data available.

Carcinogenicity

IARC

: No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

ACGIH

: No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by ACGIH.

NTP

: No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by NTP.

OSHA

: No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by OSHA.

Reproductive Toxicity

: No specific data available.

Teratogenicity

: No specific data available.

Specific Target Organ Toxicity (Single Exposure)

: Respiratory irritation.

Specific Target Organ Toxicity (Repeated Exposure)

: No specific data available.

Aspiration Hazard

: No specific data available.

Lithium borohydride

Safety Data Sheet

Section 11. Toxicological Information

Information on the Likely Routes of Exposure

: Common routes of exposure: inhalation (failure to prevent dust formation), dermal (failure to use skin protection), eye (failure to use safety eyewear). Less common: ingestion (failure to employ recommended hygiene measures (e.g. smoking after handling product without washing hands or using hand protection)).

Additional Information

: To the best of our knowledge, the chemical, physical and toxicological properties of this product have not been thoroughly investigated.

Section 12. Ecological Information

Numerical Measures of Toxicity

Toxicity to Fish

: No specific data available.

Toxicity to Daphnia and Other Aquatic Invertebrates

: No specific data available.

Toxicity to Algae

: No specific data available.

Persistence and Degradability

Biodegradability

: No specific data available.

Bioaccumulative potential

: No specific data available.

Mobility in Soil

: No specific data available.

Other Adverse Effects

: An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Section 13. Disposal Considerations

Waste Treatment Methods

Product

: Dispose of in accordance with local, state, and federal regulations. Refer to 40 CFR 260-299 for complete waste disposal regulations. Consult your local, state, and federal agencies before disposing of any chemicals.

Contaminated Packaging

: Empty containers retain product residue (dusts, aerosols, vapors and gases) and can be dangerous. Dispose of as unused product. DO NOT EXPOSE SUCH CONTAINERS TO MOISTURE, HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION; THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

Section 14. Transport Information

	DOT	IMDG	IATA
UN Number	UN1413	UN1413	UN1413
UN Proper Shipping Name	Lithium borohydride	LITHIUM BOROHYDRIDE	Lithium borohydride
Transport Hazard Classes	4.3	4.3	4.3
Packing Group	I	I	I
Environmental Hazards	-	-	-
Additional Information	-	EMS-No: F-G, S-O	-

Special Precautions for User : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transporting in Bulk According to Annex II of MARPOL 73/78 and the IBC Code : Not applicable – this cargo is not intended to be carried in bulk.

Section 15. Regulatory Information

TSCA (Toxic Substance Control Act):

This product is listed on the U.S. Toxic Substances Control Act Chemical Inventory (TSCA Inventory).

SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

SARA 311/312 Hazards

Acute Health Hazard (Acute Toxicity – Dermal, Oral, Inhalation; Skin Corrosion), Reactivity Hazard (In contact with water emits flammable gas).
