## PRODUCT SPECIFICATION

|                   |                                                                           |
|-------------------|---------------------------------------------------------------------------|
| Product Name      | <a href="#">Strontium(II) bis(2,2,6,6-tetramethyl-3,5-heptanedionate)</a> |
| Product Code      | SR0747                                                                    |
| CAS Number        | 36830-74-7                                                                |
| Molecular formula | C <sub>22</sub> H <sub>38</sub> O <sub>4</sub> Sr                         |
| Linear formula    | Sr(C <sub>11</sub> H <sub>19</sub> O <sub>2</sub> ) <sub>2</sub>          |
| Molecular weight  | 454.15                                                                    |
| Sensitivity       | moisture                                                                  |
| Melting point     | 210C                                                                      |

### TEST

### SPECIFICATION

|                    |                           |
|--------------------|---------------------------|
| Assay (purity)     | 97.5%+                    |
| Purity method      | by elemental analysis     |
| Appearance         | white solid               |
| Elemental analysis | %C=56.7-59.6; %H=8.2-8.6% |
| NMR                | conforms to structure     |
