## Specification sheet

|                   |                             |
|-------------------|-----------------------------|
| Product code      | CO0681                      |
| CAS #             | 10210-68-1                  |
| Product name      | Dicobalt Octacarbonyl       |
| Purity            | 95%                         |
| Purity method     | by titration                |
| Metal purity      | 95%+-Co                     |
| Molecular weight  | 341.95                      |
| Form              | solid                       |
| Appearance        | orange or dark red crystals |
| Melting point     | 51 to 52 °C                 |
| Molecular formula | $C_8Co_2O_8$                |
| Linear formula    | $Co_2(CO)_8$                |
