

SAFETY DATA SHEET

Section 1. Identification

Product Name:	Methylcyclopentadiene dimer
Product Type:	Liquid
CAS Number:	26472-00-4
Product Number:	C2004
Product Manufacturer:	Ereztech LLC 11555 Medlock Bridge Road, Suite 100 Johns Creek, GA 30097
Product Information:	(888) 658-1221
<u>In Case of an Emergency:</u>	CHEMTREC: 1-800-424-9300 (USA); +1 703-527-3887 (International); CCN836180 *** Contact manufacturer for all non-emergency calls.

Section 2. Hazards Identification

Appearance/Odor:	Light yellow liquid, odor not determined.
Classification:	FLAMMABLE LIQUIDS – Category 3, H226 GERM CELL MUTAGENICITY - Category 1B, H340 CARCINOGENICITY – Category 1A, H350 REPRODUCTIVE TOXICITY – Category 2, H361 HAZARDOUS TO THE AQUATIC ENVIRONMENT, ACUTE TOXICITY - Category 1, H400 HAZARDOUS TO THE AQUATIC ENVIRONMENT, CHRONIC TOXICITY - Category 1, H410

GHS Label Elements

Hazard Pictograms:

Signal Word:	DANGER
Hazard Statements:	H226: Flammable liquid and vapor. H340: May cause genetic defects. H350: May cause cancer. H361: Suspected of damaging fertility or the unborn child.

Methylcyclopentadiene dimer

Safety Data Sheet

Section 2. Hazards Identification

Hazard Statements (cont.):	H400: Very toxic to aquatic life. H410: Very toxic to aquatic life with long lasting effects.
<u>Precautionary Statements</u>	
Prevention:	P201: Obtain special instructions before use. P202: Do not handle until all safety precautions have been read and understood. P210: Keep away from heat/sparks/open flames/hot surfaces. – No smoking. P233: Keep container tightly closed. P240: Ground/Bond container and receiving equipment. P241: Use explosion-proof electrical/ventilating/lighting/processing equipment. P242: Use only non-sparking equipment. P243: Take precautionary measures against static discharge. P273: Avoid release to the environment. P280: Wear protective gloves/ protective clothing/ eye protection/ face protection.
Response:	P281: Use personal protective equipment as required. P303 + P361 + P353: IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. P308 + P313: IF exposed or concerned: Get medical advice/attention. P370 + P378: In case of fire: Use water spray, alcohol-resistant foam, carbon dioxide, dry chemical or dry sand for extinction.
Storage:	P391: Collect spillage. P403 + P235: Store in a well ventilated place. Keep cool. P405: Store locked up.
Disposal:	P501: Dispose of contents/ container to an approved wasted disposal plant.
General:	None.
OSHA/HCS Status:	This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Hazards Not Otherwise Classified (HNOC):	None identified.

Section 3. Composition/Information on Ingredients

Synonyms	: Dimethylcyclopentadiene; bis(methylcyclopentadiene)
Formula	: C ₁₂ H ₁₆
Molecular Weight	: 160.26 g/mol.
CAS-No.	: 26472-00-4

Methylcyclopentadiene dimer

Safety Data Sheet

Section 3. Composition/Information on Ingredients

Ingredient Name	%	CAS Number
Methylcyclopentadiene dimer	≥ 98	26472-00-4

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First Aid Measures

Description of Necessary First Aid Measures

- General Advice:** Move out of dangerous area. Call a POISON CENTER or doctor/physician immediately if exposed, if symptoms develop or if you feel unwell. Show this safety data sheet to the doctor in attendance. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
- Eye Contact:** Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Rinse for a minimum of 15 minutes. Check for and remove any contact lenses after initial rinse period and continue rinsing for an additional 15 minutes. Keep eyes wide open during rinsing process. Seek medical attention if eye irritation develops and persists.
- Skin Contact:** Remove all contaminated clothing and shoes. Wash off contaminated skin with soap and plenty of water. Seek medical attention if irritation develops and persists, if symptoms develop or if you feel unwell.
- Inhalation:** Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Seek medical attention if symptoms develop or if you feel unwell.
- Ingestion:** Do NOT induce vomiting. Rinse mouth. Remove dentures if any. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Seek medical attention if symptoms develop or if you feel unwell.

Most Important Symptoms/Effects, Acute and Delayed Potential Acute Health Effects

- General:** Suspected of causing genetic defects, cancer and of damaging fertility of the unborn child.
- Eye Contact:** May cause serious eye irritation. Symptoms may include stinging, tearing, redness, swelling and blurred vision.

Methylcyclopentadiene dimer

Safety Data Sheet

Section 4. First Aid Measures

- Inhalation:** Product may be harmful if inhaled. Effects on the lungs may include asthma, allergy symptoms, pneumonia, wheezing and difficult breathing. Inhalation may cause an irritation of the respiratory organs of sensitive persons resulting in obstruction of airways.
- Skin Contact:** May cause skin irritation. Symptoms may include an itching or burning sensation, reddening, swelling and blistering with tissue necrosis.
- Ingestion:** Product may be irritating to mucous membranes. Symptoms may include cramping, localized pain, headache, nausea and vomiting.

Indication of Immediate Medical Attention and Special Treatment Needed, If Necessary

- Notes to Physician:** Treat symptomatically.
- Specific Treatments:** No specific treatment.
- Protection of First Responders:** No action taken shall be taken involving any personal risk without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See Toxicological Information (Section 11)

Section 5. Fire Fighting Measures

- General Hazards:** Flammable liquid and vapor.
- Suitable Extinguishing Media:** Use sand, water spray (fog), dry chemical or carbon dioxide (CO₂).
- Unsuitable Extinguishing Media:** Do not use water jet as it may spread fire.
- Unusual Fire and Explosion Hazards:** In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. Runoff to sewer may create fire or explosion hazard. Vapors/gases released under fire conditions are heavier than air and may spread long distances along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to an ignition source and flashback.
- Product of Combustion:** Carbon oxides (CO_x). Irritating fumes and organic acid vapors may be generated during exposure to elevated temperatures or open flame.
- Protection of Firefighters:** Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Avoid contact with skin or eyes. Avoid the formation and inhalation of sprays, mists, vapors and gases.

Methylcyclopentadiene dimer

Safety Data Sheet

Section 5. Fire Fighting Measures

Protection of Firefighters (cont.):

Eliminate all local and distant ignition sources. Move containers from fire area if process can be accomplished without risk to firefighters. To reduce the possibility of explosion, use a water spray or fog to reduce direct vapors and to cool unopened containers.

Fire-fighters should wear appropriate protection equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in a positive pressure mode.

Section 6. Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures

For Non-Emergency Personnel:

No action shall be taken involving any personal risk or without suitable training. Remove all sources of ignition. Evacuate surrounding areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid the formation and inhalation of sprays, mist and vapors. Provide adequate ventilation. Wear respiratory protection. Put on appropriate personal protective equipment.

For Emergency Responders:

If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For Non-Emergency Personnel".

Environmental Precautions:

Do not allow dispersal of spilled material and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods for Containment

General:

Eliminate all local and distant ignition sources. Move containers from spill area if safe to do so. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.

Small Spill:

Contain and collect spillage with a non-combustible absorbent material (e.g. sand, earth, vermiculite or diatomaceous earth) and place in dry, sealed container for disposal according to local regulations (see Section 13).

Methylcyclopentadiene dimer

Safety Data Sheet

Section 6. Accidental Release Measures

Large Spill:

Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with a non-combustible absorbent material (e.g. sand, earth, vermiculite or diatomaceous earth) and place in dry, sealed container for disposal according to local regulations (see Section 13).

Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and Storage

Precautions:

Product is air sensitive; handle under an inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended. Keep away from all sources of ignition – NO SMOKING. Keep container tightly sealed. Avoid contact with skin, eyes and clothing. Avoid the formation and inhalation of sprays, mists, vapors and gases. Do not ingest. Avoid prolonged exposure. Ensure adequate ventilation.

Protective Measures:

Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid the formation and inhalation of sprays, mists and vapors.

Protective Measures (cont.):

Keep in the original container kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

General Occupational Hygiene:

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Safe Storage Conditions:

Product is air sensitive; store under an inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended. Store at room temperature. Keep away from all sources of ignition – NO SMOKING. Store in original container protected from direct sunlight in a dark and well-ventilated area, away from incompatible materials and food and drink. Keep container tightly closed and sealed until ready for use. Store locked up.

Methylcyclopentadiene dimer

Safety Data Sheet

Section 8. Exposure Controls/Personal Protection

Introductory Remarks:

These recommendations provide general guidance for handling this product. Because work environments and material handling practices vary, safety procedures should be developed for each intended application. While developing safe handling procedures, do not overlook the need to clean equipment and conduct regular repairs. Waste from these procedures should be handled in accordance with Section 13.

Occupational Exposure Limits:

Product contains no substances with occupational exposure limit values.

Engineering Controls:

Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Provide an eyewash/shower station.

Environmental Exposure Controls:

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual Protection Measures

Hygiene Measures:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Remove all soiled and contaminated clothing immediately. Contaminated clothing should not be allowed out of the workplace. Do not inhale sprays, mists, gases or vapors. Avoid contact with eyes and skin. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/Face Protection:

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or gases. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles, faceshield (8-inch minimum). Refer to 29 CFR 1910.133, ANSI Z87.1, or European Standard EN166.

Skin Protection

Hand Protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Methylcyclopentadiene dimer

Safety Data Sheet

Section 8. Exposure Controls/Personal Protection

Hand Protection (cont.):

Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: Chemical-resistant gloves.

Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. For full contact, wear Neoprene or nitrile rubber gloves.

Other Skin Protection:

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.

Respiratory Protection:

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multipurpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Section 9. Physical and Chemical Properties

Physical State:	Liquid.
Color:	Light yellow.
Odor:	No data available.
Odor Threshold:	No data available.
pH:	No data available.
Melting Point:	-51 °C (-60 °F).
Boiling Point:	200 °C (392 °F).

Methylcyclopentadiene dimer

Safety Data Sheet

Section 9. Physical and Chemical Properties

Flash Point:	31.8 °C (89.2 °F) – closed cup.
Auto-ignition temperature:	No data available.
Specific Gravity:	0.941 g/mL @ 25 °C (77 °F).
Vapor Pressure:	1900 Pa @ 25 °C (77 °F).
Vapor Density:	5.53.
Water Solubility:	5.2 mg/L @ 25 °C (77 °F).
Evaporation Rate:	No data available.
Viscosity, dynamic:	5.645 mPa @ 20 °C (68 °F).

Section 10. Stability and Reactivity

Reactivity:	Product can react exothermally with reducing agents to release gaseous hydrogen. May undergo autoxidation upon exposure to air to form explosive peroxides.
Chemical Stability:	This product is stable when stored under an inert atmosphere and away from heat. Nitrogen containing less than 5 ppm each moisture and air is recommended. This product is not sensitive to impact.
Conditions to Avoid:	Exposure to air, sources of ignition (heat, flames, sparks, electrostatic discharge), extremes of temperature and direct sunlight.
Incompatible Materials:	Acids and strong oxidizing agents.
Hazardous Decomposition Products:	Under normal conditions of storage and use, hazardous decomposition products should not be produced. Hazardous decomposition products formed under fire conditions: carbon oxides (CO _x). Irritating fumes and organic acid vapors may be generated during exposure to elevated temperatures or open flame. In the event of a fire: see section 5.
Possibility of Hazardous Reactions:	Under normal conditions of storage and use, hazardous reactions will not occur. Hazardous reactions or instability may occur under certain conditions of storage or use.

Section 11. Toxicological Information

Methylcyclopentadiene dimer

Safety Data Sheet

Information on Toxicological Effects

Acute Toxicity

Component	CAS No	Result	Species	Dose	Exposure
Methylcyclopentadiene dimer	26472-00-4	LD50 Oral	Rat	7,700 mg/kg	-
	26472-00-4	LC50 Inhalation	Rat	> 495 ppm	-

Irritation/Corrosion

: No specific data available.

Sensitization

: No specific data available.

Germ Cell Mutagenicity

: May cause genetic defects.

Carcinogenicity

IARC

: No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

ACGIH

: No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by ACGIH.

NTP

: No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by NTP.

OSHA

: No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by OSHA.

Reproductive Toxicity

: Suspected of damaging fertility or the unborn child.

Teratogenicity

: No specific data available.

Specific Target Organ Toxicity (Single Exposure)

: No specific data available.

Specific Target Organ Toxicity (Repeated Exposure)

: No specific data available.

Aspiration Hazard

: No specific data available.

Information on the Likely

: Common routes of exposure: inhalation, dermal (failure

Routes of Exposure

to use skin protection), eye (failure to use safety eyewear). Less common: ingestion (failure to employ recommended hygiene measures (e.g. smoking or eating after handling product without washing hands or using hand protection).

Additional Information

: To the best of our knowledge, the chemical, physical and toxicological properties of this product have not been thoroughly investigated.

Section 12. Ecological Information

Methylcyclopentadiene dimer

Safety Data Sheet

Numerical Measures of Toxicity

Component	CAS No	Test	Species	Dose	Exposure
Methylcyclopentadiene dimer	26472-00-4	LC50 Fish	Pimephales promelas	20.6 mg/l	96 h
	26472-00-4	EC50	Pseudokirchneriella subcapitata (algae)	0.42 mg/l	72 h

Persistence and Degradability

- Biodegradability** : No specific data available.
- Bioaccumulative Potential** : No specific data available.
- Mobility in Soil** : No specific data available.
- Other Adverse Effects** : An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Section 13. Disposal Considerations

Waste Treatment Methods

Product

: Dispose of in accordance with local, state, and federal regulations. Refer to 40 CFR 260-299 for complete waste disposal regulations. Consult your local, state, or federal agency before disposing of any chemicals.

Contaminated Packaging

: Empty containers retain product residue (liquids, vapors and gases) and can be dangerous. Dispose of as unused product. **DO NOT EXPOSE SUCH CONTAINERS TO MOISTURE, HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION; THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.**

Section 14. Transport Information

	DOT	IMDG	IATA
UN Number	UN 3295	UN 3295	UN 3295
UN Proper Shipping Name	Hydrocarbons, liquid, n.o.s. (Methylcyclopentadiene dimer)	HYDROCARBONS, LIQUID, N.O.S. (Methylcyclopentadiene dimer)	Hydrocarbons, liquid, n.o.s. (Methylcyclopentadiene dimer)
Transport Hazard Classes	3	3	3
Packing Group	III	III	III

Section 14. Transport Information

Methylcyclopentadiene dimer

Safety Data Sheet

Special Precautions for User : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transporting in Bulk According to Annex II of MARPOL 73/78 and the IBC Code : Not applicable.

Section 15. Regulatory Information

TSCA (Toxic Substance Control Act):

This product is not listed on the U.S. Toxic Substances Control Act Chemical Inventory (TSCA Inventory). Use of this product is restricted to research and development only. This product must be used under the supervision of a technically qualified individual as defined by the TSCA. This product must not be used for commercial purposes or in formulations for commercial purposes.

SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

SARA 311/312 Hazards

Fire Hazard (Flammable liquid); Chronic Health Hazard (carcinogenicity, germ cell mutagenicity, reproductive toxicity).

Massachusetts Right to Know Components

No components are subject to Massachusetts Right to Know Act. -

Pennsylvania Right to Know Components

No components are subject to Pennsylvania Right to Know Act.

New Jersey Right to Know Components

No components are subject to New Jersey Right to Know Act.

California Proposition 65 Components

This product does not contain any chemicals known to State of California to cause cancer, birth defects, or any other reproductive harm.
