

SAFETY DATA SHEET

Section 1. Identification

Product Name:	Hafnium 2,4-pentanedionate
Product Type:	Solid
CAS Number:	17475-67-1
Product Number:	HF5671
Product Manufacturer:	Ereztech LLC 11555 Medlock Bridge Road, Suite 100 Johns Creek, GA 30097
Product Information:	(888) 658-1221
<u>In case of an emergency:</u>	CHEMTREC: 1-800-424-9300 (USA); +1 703-527-3887 (International); CCN836180 *** Contact manufacturer for all non-emergency calls.

Section 2. Hazards Identification

Emergency Overview

Appearance/Odor:	Off-white solid, odor not determined.
Classification:	SKIN CORROSION/IRRITATION; - Category 2, H315 SERIOUS EYE DAMAGE/EYE IRRITATION; - Category 2A, H319 SPECIFIC TARGET ORGAN TOXICITY, SINGLE EXPOSURE; RESPIRATORY TRACT IRRITATION – Category 3, H335

GHS label elements

Signal word:	WARNING
Hazard statements:	H315: Causes skin irritation. H319: Causes serious eye irritation. H335: May cause respiratory irritation.

Hazard pictograms:

Precautionary statements

Prevention:	P261: Avoid breathing fumes/mist/vapors/spray. P264: Wash hands and exposed skin thoroughly after handling. P271: Use only outdoors or in a well-ventilated area.
--------------------	---

Hafnium 2,4-pentanedionate

Safety Data Sheet

Section 2. Hazards Identification

Prevention (cont.):	P280: Wear protective gloves/ protective clothing/ eye protection/ face protection.
Response:	P302 + P352: IF ON SKIN: Wash with plenty of soap and water. P304 + P340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. P305 + P351 + P338: IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P332 + P313: If skin irritation occurs: Get medical advice/attention. P337 + P313: If eye irritation persists: Tet medical advice/attention. P362: Take off contaminated clothing and wash before reuse.
Storage:	P403 + P233: Store in a well-ventilated place. Keep container tightly closed. P405: Store locked up.
Disposal:	P501: Dispose of contents/ container to an approved wasted disposal plant.
General:	None.
OSHA/HCS status:	This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Hazards not otherwise classified:	None known.

Section 3. Composition/Information on Ingredients

Substances

Synonyms	: Hafnium(IV) 2,4-pentanedionate; Hafnium acetylacetonate.
Formula	: $C_{20}H_{28}HfO_8$
Molecular weight	: 574.92 g/mol
CAS-No.	: 17475-67-1

Ingredient Name	%	CAS Number
Hafnium 2,4-pentanedionate	>97	17475-67-1

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Hafnium 2,4-pentanedionate

Safety Data Sheet

Section 4. First Aid Measures

Description of Necessary First Aid Measures

General Advice: Move out of dangerous area. Consult a physician. Show this safety data sheet to the doctor in attendance.

Eye Contact: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Rinse for a minimum of 15 minutes. Check for and remove any contact lenses after initial rinse period and continue rinsing for an additional 15 minutes. Keep eyes wide open during rinsing process. Get medical attention if irritation develops and persists.

Skin Contact: Remove all contaminated clothing and shoes. Wash off contaminated skin with soap and plenty of water. Get medical attention if irritation develops and persists.

Inhalation: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Immediately call a POISON CENTER or doctor/physician.

Ingestion: Rinse mouth. Remove dentures if any. Drink plenty of water. Do NOT induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. Immediately call a physician or POISON CONTROL CENTER.

Most Important Symptoms/Effects, Acute And Delayed Potential Acute Health Effects

Eye Contact: May cause immediate or delayed severe eye irritation. Symptoms may include stinging, tearing and redness.

Inhalation: Single exposure to dusts or aerosols may cause respiratory irritation. Symptoms may include coughing, sneezing and a shortness of breath.

Skin Contact: Symptoms may include reddening of skin and a burning or itching sensation.

Ingestion: No specific data available.

Indication of Immediate Medical Attention and Special Treatment Needed, If Necessary

Notes to Physician: Treat symptomatically.

Specific Treatments: No specific treatment.

Protection of First Responders: No action taken shall be taken involving any personal risk without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Hafnium 2,4-pentanedionate

Safety Data Sheet

Section 5. Fire Fighting Measures

General Hazards:	None known.
Suitable Extinguishing Media:	Use water spray, sand, dry chemical or carbon dioxide (CO ₂). Fight larger fires with water spray or alcohol resistant foam.
Unsuitable Extinguishing Media:	None identified.
Unusual Fire and Explosion Hazards:	Unopened containers may become pressurized and rupture during a fire. Use water spray to cool unopened containers. Thermal decomposition can lead to the production of irritating fumes and organic acid vapors.
Product of Combustion:	Decomposition products may include carbon oxides (CO _x) and hafnium oxide fumes.
Protection of Firefighters:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Fire-fighters should wear appropriate protection equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in a positive pressure mode.

Section 6. Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures

For Non-emergency Personnel:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Remove all ignition sources. Prevent unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid inhalation of aerosols and dusts. Provide adequate ventilation. Wear respiratory protection. Put on appropriate personal protective equipment.
For Emergency Responders:	If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel".
Environmental Precautions:	Do not allow dispersal of spilled material and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods for Containment

Small Spill:	Contain spill with an inert binding material (sand, diatomite, universal binders), sweep up and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
---------------------	--

Hafnium 2,4-pentanedionate

Safety Data Sheet

Section 6. Accidental Release Measures

Large Spill:

Contain and collect spillage with inert binding material (e.g. sand, earth, vermiculite or diatomaceous earth) and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and Storage

Precautions:

Handle under an inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended. Product is moisture sensitive and decomposes slowly when exposed to water or moisture in air. Store in cool/dry place in tightly closed container. Keep container tightly sealed when not in use. Avoid the formation and inhalation of dusts and aerosols. Avoid prolonged exposure. Provide adequate ventilation.

Protective Measures:

Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid the formation and inhalation of dusts and aerosols. Keep in the original container kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

General Occupational Hygiene:

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Safe Storage Conditions:

Store under an inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended. Product is moisture sensitive and decomposes slowly when exposed to water or moisture in air. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (air, moisture, strong oxidizing agents) and food and drink. Keep container tightly closed and sealed until ready for use. Store locked up.

Hafnium 2,4-pentanedionate

Safety Data Sheet

Section 8. Exposure Controls/Personal Protection

Introductory Remarks:

These recommendations provide general guidance for handling this product. Because work environments and material handling practices vary, safety procedures should be developed for each intended application. While developing safe handling procedures, do not overlook the need to clean equipment and conduct regular repairs. Waste from these procedures should be handled in accordance with Section 13.

Occupational Exposure Limits:

List	Components	CAS-No.	Type	Value
ACGIH	Hafnium 2,4-pentanedionate	17475-67-1	TLV	0.5 mg/m ³ as Hf TWA
NIOSH	Hafnium 2,4-pentanedionate	17475-67-1	REL	0.5 mg/m ³ as Hf TWA
OSHA	Hafnium 2,4-pentanedionate	17475-67-1	PEL	0.5 mg/m ³ as Hf TWA

Engineering Controls:

Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Provide an eyewash/shower station.

Environmental Exposure Controls:

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual Protection Measures

Hygiene Measures:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Remove all soiled and contaminated clothing immediately. Do not inhale dusts or aerosols. Avoid contact with eyes and skin. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/Face Protection:

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles, faceshield (8-inch minimum). Refer to 29 CFR 1910.133, ANSI Z87.1, or European Standard EN166.

Hafnium 2,4-pentanedionate

Safety Data Sheet

Section 8. Exposure Controls/Personal Protection

Skin Protection

Hand Protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: Chemical-resistant gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Full contact

Material: Neoprene or nitrile rubber.

Other Skin Protection:

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory Protection:

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multipurpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Section 9. Physical and Chemical Properties

Physical State:

Solid.

Color:

Off-white.

Odor:

No data available.

Odor Threshold:

No data available.

pH:

No data available.

Melting Point:

193 °C (379.4 °F).

Hafnium 2,4-pentanedionate

Safety Data Sheet

Section 9. Physical and Chemical Properties

Boiling Point:	82 °C (179.6 °F) @ 1 mmHg.
Flash Point:	No data available.
Auto-ignition temperature:	No data available.
Flammability:	No data available.
Specific Gravity:	No data available.
Vapor Pressure:	No data available.
Vapor Density:	No data available.
Water Solubility:	Insoluble. Decomposes slowly when exposed to water.
Evaporation Rate:	No data available.
Viscosity:	No data available.

Section 10. Stability and Reactivity

Reactivity:	No specific data available.
Chemical Stability:	Stable at normal ambient temperature and pressure and under recommended storage conditions.
Conditions to Avoid:	Exposure to water or moisture in air.
Incompatible Materials:	Air, moisture in air, water, and strong oxidizing agents.
Hazardous Decomposition Products	Under normal conditions of storage and use, hazardous decomposition products should not be produced. Hazardous decomposition products formed under fire conditions: carbon oxides and hafnium oxide fumes. In the event of a fire: see section 5.
Possibility of Hazardous Reactions:	Product decomposes slowly when exposed to moisture in air or water.

Section 11. Toxicological Information

Information on Toxicological Effects

Acute Toxicity	: No specific data available.
Irritation/Corrosion	: No specific data available. Causes skin irritation. Causes serious eye irritation.
Sensitization	: No specific data available.
Germ Cell Mutagenicity	: No effects known.
Carcinogenicity	
IARC	: No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

Hafnium 2,4-pentanedionate

Safety Data Sheet

Section 11. Toxicological Information

Carcinogenity (cont.)

- ACGIH** : No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by ACGIH.
- NTP** : No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by NTP.
- OSHA** : No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by OSHA.

Reproductive Toxicity

- : This product is not expected to cause reproductive or developmental effects.

Teratogenicity

- : No specific data available.

Specific Target Organ Toxicity (single exposure)

- : Respiratory tract irritation.

Specific Target Organ Toxicity (repeat exposure)

- : No specific data available.

Aspiration Hazard

- : No specific data available.

Information on the likely routes of exposure

- : No specific data available.

Additional Information

- : May be harmful if swallowed. To the best of our knowledge, the chemical, physical and toxicological properties of this product have not been thoroughly investigated.

Section 12. Ecological Information

Numerical Measures of Toxicity

- Toxicity to Fish** : No specific data available.

- Toxicity to daphnia and other aquatic invertebrates** : No specific data available.

- Toxicity to algae** : No specific data available.

Persistence and Degradability

- Biodegradability** : No specific data available.

- Bioaccumulative potential** : No specific data available.

- Mobility in soil** : No specific data available.

- Other Adverse Effects** : An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Hafnium 2,4-pentanedionate

Safety Data Sheet

Section 13. Disposal Considerations

Waste Treatment Methods

- Product** : Dispose of in accordance with local, state, and federal regulations. Refer to 40 CFR 260-299 for complete waste disposal regulations. Consult your local, state, or federal agency before disposing of any chemicals.
- Contaminated Packaging** : Empty containers retain product residue (dusts, vapors and gases) and can be dangerous. Do not reuse.

Section 14. Transport Information

	DOT	IMDG	IATA
UN Number	Not regulated	Not regulated	Not regulated
UN Proper Shipping Name	-	-	-
Transport Hazard Classes	-	-	-
Packing Group	-	-	-
Environmental Hazards	-	-	-
Additional Information	-	-	-

Special Precautions for User : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transporting in Bulk According to Annex II of MARPOL 73/78 and the IBC Code : Not applicable.

Section 15. Regulatory Information

TSCA (Toxic Substance Control Act):

This product is not listed on the U.S. Toxic Substances Control Act Chemical Inventory (TSCA Inventory). Use of this product is restricted to research and development only. This product must be used under the supervision of a technically qualified individual as defined by the TSCA. This product must not be used for commercial purposes or in formulations for commercial purposes.

SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

Hafnium 2,4-pentanedionate
