# SAFETY DATA SHEET

### Section 1. Identification

Product Name:	Molybdenum(VI) tetrachloride oxide
Product Type:	Solid
CAS Number:	13814-75-0
Product Number:	<u>MO4750</u>
Product Manufacturer:	Ereztech LLC 11555 Medlock Bridge Road, Suite 100 Johns Creek, GA 30097
Product Information: In Case of an Emergency:	(888) 658-1221 CHEMTREC: 1-800-424-9300 (USA); +1 703-527-3887 (International); CCN836180 *** Contact manufacturer for all non-emergency calls.

### Section 2. Hazards Identification

Appearance/Odor: Classification:

GHS Label Elements Hazard Pictograms: Green powder, pungent odor. SKIN CORROSION/IRRITATION - Category 1B, H314 SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1, H318

Signal Word: Hazard Statements: DANGER

- H314: Causes severe skin burns and eye damage.
- H318: Causes serious eye damage.

Precautionary Statements Prevention: P260:

Response:

- P260: Avoid breathing gases, vapors or mists.
- P264: Wash skin thoroughly after handling.

P280: Wear protective gloves/ protective clothing/ eye protection/ face protection.

P301 + P330 + P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

Section 2. Hazards Identification		
Response (cont.):	<ul> <li>P303 + P361 + P353: If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.</li> <li>P304 + P340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.</li> <li>P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present. Continue rinsing.</li> </ul>	
Character	P310: Immediately call a POISON CENTER or doctor/physician.	
Storage:	P405: Store locked up.	
Disposal:	P501: Dispose of contents/ container to an approved wasted disposal plant.	
OSHA/HCS status:	This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).	
Hazards Not Otherwise Classified (HNOC):	Product hydrolyzes readily to produce hydrogen chloride gas.	

### Section 3. Composition/Information on Ingredients

Substances			
Formula	: Cl <sub>4</sub> MoO		
Molecular Weight	: 253.75 g/mol		
CAS-No.	: 13814-75-0		
Ingredient Name		%	CAS Number
Molybdenum(VI) tetrachloride ox	ide	≥ 98	13814-75-0

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First Aid Measures

#### **Description of Necessary First Aid Measures**

**General Advice:** Move out of dangerous area. Call a physician or POISON CONTROL CENTER immediately. Show this safety data sheet to the doctor in attendance.

- **Eye Contact:** Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue rinsing. Call a physician or POISON CONTROL CENTER immediately.
- Skin Contact: Take off contaminated clothing and shoes immediately. Wash off contaminated skin with soap and plenty of water. Call a physician or POISON CONTROL CENTER immediately

Section 4. First Aid Measures			
Inhalation: Ingestion:	breathing. If not br occurs, provide artif dangerous to the per unconscious, place Maintain an open ai waistband. Call a p Rinse mouth. Do N occurs, the head sh Never give anything recovery position ar airway. Loosen tigh	emove victim to fresh air and keep at rest in a position comfortable for reathing. If not breathing, if breathing is irregular or if respiratory arrest ccurs, provide artificial respiration or oxygen by trained personnel. It may be angerous to the person providing aid to give mouth-to-mouth resuscitation. If neonscious, place in recovery position and get medical attention immediately. aintain an open airway. Loosen tight clothing such as a collar, tie, belt or aistband. Call a physician or POISON CONTROL CENTER immediately inse mouth. Do NOT induce vomiting. Remove dentures if any. If vomiting ccurs, the head should be kept low so that vomit does not enter the lungs. ever give anything by mouth to an unconscious person. If unconscious, place in ecovery position and get medical attention immediately. Maintain an open rway. Loosen tight clothing such as a collar, tie, belt or waistband. Call a nysician or POISON CONTROL CENTER immediately.	
Most Important Sy	mptoms/Effects, Ac	ute And Delayed Potential Acute Health Effects	
Eye Contact:	Causes serious eye damage. Symptoms may include watering, redness, pain, swelling of the eyelids, inability to keep eye open, blurred vison and temporary/permanent loss of vision.		
Inhalation:	Product is extremely corrosive to mucous membranes and tissues of the upper respiratory tract. Symptoms may include a burning sensation, coughing, coughing up blood (hemoptysis), wheezing, laryngitis, shortness of breath/ difficulty in breathing (dyspnea), blueness (cyanosis) of lips and skin, nausea, headaches, disorientation, general weakness and loss of consciousness.		
Skin Contact:	Skin contact with this product may be expected to cause (severe) chemical burns. Symptoms may include burning, itching, pain, redness, swelling and blistering with tissue necrosis.		
Ingestion:	Ingestion may be expected to result in burns of the mouth and throat and potential perforation of the esophagus and stomach. Symptoms may include pain when swallowing (odynophagia), difficulty swallowing (dysphagia), fever, nausea, recurrent vomiting (emesis) and vomiting of blood (hematemesis). Severe burns which may be accompanied by perforation of the esophagus and stomach may present additional symptoms of abdominal pain/rigidity, chest and/or back pain.		
Indication of Immediate Medical Attention and Special Treatment Needed, If Necessary			
Notes to Physician:	:	Treat symptomatically.	
Specific Treatment	S:	No specific treatment.	
Protection of First Responders:		No action taken shall be taken involving any personal risk without suitable training. It may be dangerous to the	

See Toxicological Information (Section 11)

person providing aid to give mouth-to-mouth resuscitation.

Section 5. Fire Fighting Measures		
General Hazards:	Product hydrolyzes readily to produce hydrogen chloride gas.	
Suitable Extinguishing Media:	THE MOST EFFECTIVE FIRE EXTINGUISHING AGENT IS DRY CHEMICAL POWDER PRESSURIZED WITH NITROGEN. Vermiculite, sand, dry chemical or carbon dioxide (CO <sub>2</sub> ) may also be used. Use water spray to cool containers.	
Unsuitable Extinguishing Media:	Product hydrolyzes readily to produce hydrogen chloride gas. The use of water as an extinguishing agent should be restricted to instances where the effects associated with the generation of hydrogen chloride gas and hydrochloric acid can be minimized.	
Unusual Fire and Explosion Hazards:	Product does not burn.	
Product of Combustion:	Combustion of product may be expected to produce toxic and corrosive fumes. Products of combustion include hydrogen chloride and molybdenum oxides.	
Protection of Firefighters:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Avoid contact with skin or eyes. Avoid breathing dusts, aerosols, vapors and gases.	
	Move containers from fire area if process can be accomplished without risk to firefighters. To reduce the possibility of explosion, use a water spray or fog to reduce direct vapors and to cool unopened containers.	
	Fire-fighters should wear appropriate protection equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in a positive pressure mode.	

### Section 6. Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures		
For Non-Emergency Personnel:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid inhalation of dusts or mist. Provide adequate ventilation. Wear respiratory protection. Put on appropriate personal protective equipment.	
For Emergency Responders:	If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel".	

Section 6.	Accidental Release Measures
Environmental Precautions:	Do not allow dispersal of spilled material and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for Containment	
General:	Spilled material will likely give off fumes. Move containers from spill area if safe to do so. Avoid allowing the spilled material to get wet or using water to clean up spillages or residues.
Small Spill:	Contain and collect spillage with a dry binding material (e.g. sand, earth, vermiculite or diatomaceous earth) and place in dry, sealed container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor.
Large Spill:	Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with a dry binding material (e.g. sand, earth, vermiculite or diatomaceous earth) and place in dry, sealed container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Do not flush spill area with water or aqueous cleaning solution as the release of hydrogen chloride gas may occur.
	Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

### Section 7. Handling and Storage

Product is moisture sensitive; handle under a dry, inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended. Keep container tightly sealed. Avoid contact with skin, eyes and clothing. Avoid the formation and inhalation of dusts, aerosols, vapors and gases. Do not ingest. Avoid prolonged exposure. Ensure adequate ventilation.

Protective Measures:Put on appropriate personal protective equipment (see Section<br/>8). Keep in the original container kept tightly closed when not<br/>in use. Empty containers retain product residue and can be<br/>hazardous. Do not reuse container.

Precautions:

### Section 7. Handling and Storage

General Occupational Hygiene:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Safe Storage Conditions:	Product is moisture sensitive; store under an inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended. Store in original container protected from direct sunlight in a dry and well-ventilated area, away from incompatible materials and food and drink. Keep container tightly closed and sealed until ready for use. Store locked up.

### Section 8. Exposure Controls/Personal Protection

Introductory Remarks:

These recommendations provide general guidance for handling this product. Because work environments and material handling practices vary, safety procedures should be developed for each intended application. While developing safe handling procedures, do not overlook the need to clean equipment and conduct regular repairs. Waste from these procedures should be handled in accordance with Section 13.

List	Components	CAS-No.	Туре	Value
ACGIH	Hydrochloric acid	7647-01-0	С	2 ppm (TLV)
California	Hydrochloric acid	7647-01-0	С	2 ppm
			PEL	0.3 ppm 0.45 mg/m <sup>3</sup>
NIOSH	Hydrochloric acid	7647-01-0	С	5 ppm 7 mg/m <sup>3</sup>
OSHA	Hydrochloric acid	7647-01-0	С	5 ppm 7 mg/m <sup>3</sup>

#### **Occupational Exposure Limits**

Engineering Controls:

Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Provide an eyewash/shower station.

**Environmental Exposure Controls:** Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### Section 8. Exposure Controls/Personal Protection

#### Individual Protection Measures

#### **Hygiene Measures:**

Eye/Face Protection:

Skin Protection Hand Protection:

**Other Skin Protection:** 

**Respiratory Protection:** 

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Remove all soiled and contaminated clothing immediately. Do not inhale dusts, aerosols, vapors or gases. Avoid contact with eyes and skin. Ensure that eyewash stations and safety showers are close to the workstation location.

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles, faceshield (8-inch minimum). Refer to 29 CFR 1910.133, ANSI Z87.1, or European Standard EN166.

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: Chemical-resistant gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. For full contact, use Neoprene or nitrile rubber.

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multipurpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls.

### Section 8. Exposure Controls/Personal Protection

Respiratory Protection (cont.):

If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

### Section 9. Physical and Chemical Properties

## Section 10. Stability and Reactivity

#### Possibility of Hazardous Reactions:

Under normal conditions of storage and use noted above, hazardous reactions will not occur. Hazardous reactions or instability may occur under certain conditions of storage or use. In contact with water, product releases hydrogen chloride gas.

Section 11.	Toxicological Information
Information on the Likely Routes of Exposure (cont.)	: Less common: ingestion (failure to employ recommended hygiene measures (e.g. smoking after handling product without washing hands or using hand protection).
Additional Information	: To the best of our knowledge, the chemical, physical and toxicological properties of this product have not been thoroughly investigated.

### Section 12. Ecological Information

Numerical Measures of Toxicity

**Toxicity to Fish** 

: No specific data available.

**Toxicity to Daphnia and Other Aquatic Invertebrates** 

**Toxicity to Algae** 

Persistence and Degradability

**Biodegradability** 

**Bioaccumulative Potential** 

**Mobility in Soil** 

**Other Adverse Effects** 

- : No specific data available.
- : An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

### Section 13. Disposal Considerations

### Waste Treatment Methods **Product**

Dispose of in accordance with local, state, and federal regulations. Refer to 40 CFR 260-299 for complete waste disposal regulations. Consult your local, state, or federal agency before disposing of any chemicals.

**Contaminated Packaging** 

Empty containers retain product residue (dusts, vapors, gases) and can be dangerous. Dispose of as unused product.

**Special Precautions for User** 

: Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transporting in Bulk According to Annex II of MARPOL 73/78 and the IBC Code : Not applicable.

### Section 15. Regulatory Information

#### **TSCA (Toxic Substance Control Act):**

This product is not listed on the U.S. Toxic Substances Control Act Chemical Inventory (TSCA Inventory). Use of this product is restricted to research and development only. This product must be used under the supervision of a technically qualified individual as defined by the TSCA. This product must not be used for commercial purposes or in formulations for commercial purposes.

#### SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

#### SARA 313 Components

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

#### SARA 311/312 Hazards

Acute Health Hazard (Skin Corrosion or Irritation; Serious eye damage or eye irritation).

#### Massachusetts Right to Know Components

No components are subject to Massachusetts Right to Know Act.

#### Pennsylvania Right to Know Components

No components are subject to Pennsylvania Right to Know Act.

### Section 15. Regulatory Information

#### New Jersey Right to Know Components

No components are subject to New Jersey Right to Know Act.

#### California Proposition 65 Components

This product does not contain any chemicals known to State of California to cause cancer, birth defects, or any other reproductive harm.
