

SAFETY DATA SHEET

Section 1. Identification

Product Name: [Hexamethylphosphorous triamide](#)
Product Type: Liquid
CAS Number: 1608-26-0
Product Number: P8260
Recommended Use: Laboratory chemicals, synthesis of substances.
Product Manufacturer: Ereztech LLC
11555 Medlock Bridge Road, Suite 100
Johns Creek, GA 30097
Product Information: (888) 658-1221
In Case of an Emergency: CHEMTREC: 1-800-424-9300 (USA);
+1 703-527-3887 (International); CCN836180
*** Contact manufacturer for all non-emergency calls.

Section 2. Hazards Identification

Appearance / Odor: Colorless to slightly yellow liquid, odor not determined.
Classification: FLAMMABLE LIQUIDS – Category 3, H226
SKIN CORROSION/IRRITATION – Category 2, H315
SERIOUS EYE DAMAGE/EYE IRRITATION – Category 2A, H319
SPECIFIC TARGET ORGAN TOXICITY, SINGLE EXPOSURE;
RESPIRATORY TRACT IRRITATION – Category 3, H335
GERM CELL MUTAGENICITY – Category 1A, H340
CARCINOGENICITY – Category 1A, H350

GHS Label Elements

Hazard Pictograms:

Signal Word: DANGER
Hazard Statements: H226: Flammable liquid and vapor.
H315: Causes skin irritation.
H319: Causes serious eye irritation.
H335: May cause respiratory irritation.

Hexamethylphosphorous triamide

Safety Data Sheet

Section 2. Hazards Identification

Hazard Statements (cont.):

H340: May cause genetic defects.

H350: May cause cancer.

Precautionary Statements

Prevention:

P203: Obtain, read and follow all safety instructions before use.

P210: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P233: Keep container tightly closed.

P240: Ground and bond container and receiving equipment.

P241: Use explosion-proof electrical, ventilating, lighting and handling equipment.

P242: Use non-sparking tools.

P243: Take action to prevent static discharges.

P261: Avoid breathing sprays, mists, vapors and gases.

P264 + P265: Wash hands and exposed skin thoroughly after handling. Do not touch eyes.

P271: Use only outdoors or with adequate ventilation.

P280: Wear protective gloves/protective clothing/eye protection/face protection/hearing protection.

Response:

P302 + P352: IF ON SKIN: Wash with plenty of water.

P303 + P361 + P353: IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse affected areas with water.

P304 + P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing.

P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P318: If exposed or concerned, get medical advice.

P319: Get medical help if you feel unwell.

P332 + P317: If skin irritation occurs: Get medical help.

P337 + P317: If eye irritation persists: Get medical help.

P362 + P364: Take off contaminated clothing and wash it before reuse.

P370 + P378: In case of fire: Use dry chemical, carbon dioxide or alcohol-resistant foam to extinguish.

Storage:

P403 + P233 + P235: Store in a well-ventilated place. Keep container tightly closed. Keep cool.

P405: Store locked up.

Disposal:

P501: Dispose of contents and container in accordance with federal, state and local regulations.

OSHA/HCS Status:

This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200, 2024).

Hazards Not Otherwise Classified (HNOC):

None identified.

Hexamethylphosphorous triamide

Safety Data Sheet

Section 3. Composition/Information on Ingredients

Substance Type: Mono-constituent.
Synonyms: N,N,N',N',N'',N''-Hexamethylphosphanetriamine;
Tris(dimethylamino)phosphine; Hexametapil;
Hexamethyltriamidophosphite; HMPA; P(NMe₂)₃.
Formula: C₆H₁₈N₃P
Molecular Weight: 163.20 g/mol.
EC-No. : 216-534-4

Component Name	%	CAS Number
Hexamethylphosphorous triamide	≥ 98	1608-26-0
Hexamethylphosphoramidate	0.5 – 1.5	680-31-9

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section. Occupational exposure limits, if available, are listed in Section 8.

Section 4. First Aid Measures

Description of Necessary First Aid Measures

General Advice: Move out of dangerous area. If unconscious, place in recovery position and get medical help immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. Show this safety data sheet to the doctor in attendance. If exposed or concerned, get medical advice.

Eye Contact: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses if easy to do. Continue rinsing. Get medical help if eye irritation develops and persists.

Skin Contact: Take off contaminated clothing and shoes immediately. Wash off contaminated skin with plenty of water. Get medical help if irritation develops and persists.

Inhalation: Remove person to fresh air and keep comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical help if symptoms develop or if you feel unwell.

Ingestion: Rinse mouth. Do NOT induce vomiting. Remove dentures if any. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Get medical help if symptoms develop or if you feel unwell.

Most Important Symptoms/Effects, Acute and Delayed Potential Acute Health Effects

Eye Contact: Symptoms may include stinging, tearing, redness, swelling and blurred vision.

Skin Contact: Symptoms may include an itching or burning sensation, reddening and swelling.

Inhalation: Symptoms may include coughing, sneezing with phlegm production, sore throat, nausea, headache, vomiting.

Hexamethylphosphorous triamide

Safety Data Sheet

Section 4. First Aid Measures

Ingestion: Product may be expected to be irritating to mucous membranes. Symptoms may include cramping, localized pain, headache, nausea and vomiting.

Indication of Immediate Medical Attention and Special Treatment Needed, If Necessary

Notes to Physician: Treat symptomatically.

Specific Treatments: No specific treatment indicated.

Protection of First Responders: No action taken shall be taken involving any personal risk without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See Toxicological Information (Section 11)

Section 5. Fire Fighting Measures

General Hazards: Category 3 flammable liquid.

Suitable Extinguishing Media: THE MOST EFFECTIVE FIRE EXTINGUISHING AGENT IS DRY CHEMICAL POWDER PRESSURIZED WITH NITROGEN. Carbon dioxide (CO₂) or alcohol-resistant foam may also be used.

Unsuitable Extinguishing Media: The use of water spray (fog) may be ineffective and the use of a water jet may serve to spread the fire.

Unusual Fire and Explosion Hazards: Vapor/gases released under fire conditions are heavier than air and may form explosive mixtures with air at elevated temperatures. Product runoff to sewer may create a fire or explosion hazard. Vapors/gases released may spread long distances along the ground and may accumulate in low or confined areas or travel a considerable distance to an ignition source and flashback.

Products of Combustion: Carbon oxides (CO_x) and oxides of phosphorus. Irritating and potentially harmful fumes and organic acid vapors may be generated during exposure to elevated temperatures or open flame.

Protection of Firefighters: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Avoid contact with skin, eyes and clothing and the formation and inhalation of sprays, mists, vapors and gases.

Eliminate all local and distant ignition sources. Stop leakage and move unopened containers from fire area if process can be accomplished without risk to firefighters. Do not attempt to move heated containers. To reduce the possibility of explosion, use a water spray or fog to reduce direct vapors and to cool unopened containers.

Hexamethylphosphorous triamide

Safety Data Sheet

Section 5. Fire Fighting Measures

Protection of Firefighters (cont.): Do not cut, grind, drill or weld on or near product containers (even empty) of this product because an explosion may result. Fire-fighters should wear appropriate protection equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in a positive pressure mode.

Section 6. Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures

For Non-Emergency Personnel: No action shall be taken involving any personal risk or without suitable training. Eliminate all local and distant ignition sources – NO SMOKING. Take action to prevent static discharges. Use non-sparking tools and explosion-proof equipment. Beware of vapors accumulating in low areas to form explosive concentrations. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment. Avoid contact with skin, eyes or clothing and the formation and inhalation of sprays, mists, vapors and gases. Provide adequate ventilation or wear respiratory protection.

For Emergency Responders: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For Non-Emergency Personnel".

Environmental Precautions: Prevent spilled material and firefighting runoff from entering the surrounding environment (soil contact, entry into drains, sewers and waterways). Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods for Containment

General: Eliminate all local and distant ignition sources. Approach release from upwind. Stop leakage and move unopened containers from spill area if safe to do so. Do not attempt to move heated containers. Use spark-proof tools and explosion-proof equipment. Dispose of collected spillage in accordance with national, federal, state and local regulations (see Section 13). Contaminated absorbent material may pose the same hazard as the spilled product.

Hexamethylphosphorous triamide

Safety Data Sheet

Section 6. Accidental Release Measures

Small Spill:	Collect spillage with a dry, non-combustible, absorbent material (e.g. dry sand, vermiculite or diatomaceous earth) and place in dry, sealed container for disposal.
Large Spill:	Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with dry, non-combustible, absorbent material (e.g. dry sand, vermiculite or diatomaceous earth) and place in dry, sealed container for disposal. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and Storage

Precautions:	Product is air/moisture sensitive; handle under a dry, inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended. Keep away from all sources of ignition – NO SMOKING. Keep container tightly sealed. Avoid contact with skin, eyes and clothing and the formation and inhalation of sprays, mists, vapors and gases. Do not ingest. Avoid prolonged exposure. Ensure adequate ventilation or wear respiratory protection.
Protective Measures:	Put on appropriate personal protective equipment (see Section 8). Keep in the original container kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
General Occupational Hygiene:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking or smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Safe Storage Conditions:	Product is air/moisture/light sensitive; store under an inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen and a temperature range of 2 – 8 °C is recommended. Keep away from all sources of ignition – NO SMOKING. Store in original container protected from direct sunlight in a cool, dry and well-ventilated area, away from incompatible materials and food and drink. Keep container tightly closed and sealed until ready for use. Store locked up.

Hexamethylphosphorous triamide

Safety Data Sheet

Section 8. Exposure Controls/Personal Protection

Introductory Remarks:

These recommendations provide general guidance for handling this product. Because work environments and material handling practices vary, safety procedures should be developed for each intended application. While developing safe handling procedures, do not overlook the need to clean equipment and conduct regular repairs. Waste from these procedures should be handled in accordance with Section 13.

Occupational Exposure Limits:

Product, as supplied, does not contain any hazardous materials with occupational exposure limits established by the region-specific regulatory bodies.

Engineering Controls:

Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Provide an eyewash/shower station.

Environmental Exposure Controls:

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual Protection Measures

Hygiene Measures:

Avoid all unnecessary exposure. Wash all exposed skin (hands, forearms and face) thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Remove all soiled and contaminated clothing immediately. Avoid contact with eyes, skin and clothing and the formation and inhalation of sprays, mists, vapors or gases. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/Face Protection:

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to sprays and mists. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles, faceshield (8-inch minimum). Refer to 29 CFR 1910.133, ANSI Z87.1, or European Standard EN166.

Skin Protection

Hand Protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties.

Hexamethylphosphorous triamide

Safety Data Sheet

Section 8. Exposure Controls/Personal Protection

Hand Protection (cont.):

It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: Chemical-resistant gloves.

Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. For full contact, wear Neoprene or nitrile rubber gloves.

Other Skin Protection:

When there is a risk of ignition from static electricity discharges, wear anti-static, flame retardant protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Each person who is reasonably likely to be dermally exposed should wear dermal personal protective equipment impervious to the chemical substance, selected and used in accordance with the OSHA requirements at 29 CFR 1910.132, 1910.133, and 1910.138.

Respiratory Protection:

Where risk assessment shows air-purifying respirators are appropriate, each person who is reasonably likely to be exposed to the chemical substance by inhalation should wear NIOSH-approved APF 1000 respirator in accordance with 29 CFR 1910.134 and 42 CFR part 84. If the respirator is the sole means of protection, use a full-face supplied air respirator.

Section 9. Physical and Chemical Properties

Physical State:	Liquid.
Color:	Yellow.
Odor:	No data available.
Odor Threshold:	No data available.
pH:	No data available.
Melting Point:	-44 °C (-47.2 °F).
Boiling Point:	48 – 50 °C (118 – 122 °F) at 16 hPa.
Flash Point:	27 °C (81 °F) – closed cup.
Auto-ignition Temperature:	No data available.

Hexamethylphosphorous triamide

Safety Data Sheet

Section 9. Physical and Chemical Properties

Vapor Pressure:	No data available.
Density:	0.898 g/cm ³ .
Water Solubility:	Soluble.
Evaporation Rate:	No data available.
Viscosity:	No data available.

Section 10. Stability and Reactivity

Reactivity:	Product is highly flammable; vapors may form explosive mixture with air at elevated temperatures. Product rapidly oxidizes to release hexamethylphosphoramidate.
Chemical Stability:	Product is stable when stored under a dry, inert atmosphere and away from heat. Nitrogen containing less than 5 ppm each moisture and air and a temperature of 2 – 8 °C is recommended.
Conditions to Avoid:	Exposure to air/moisture, sources of ignition (heat, flames, sparks, electrostatic discharge), extremes of temperature and direct sunlight.
Incompatible Materials:	Strong oxidizing agents.
Hazardous Decomposition Products:	Hazardous decomposition products formed under fire conditions: hexamethylphosphoramidate, carbon oxides (CO _x) and oxides of phosphorus. Irritating and potentially harmful fumes may be generated during exposure to elevated temperatures or open flame. In the event of a fire: see Section 5.
Possibility of Hazardous Reactions:	Under normal conditions of storage and use noted above, hazardous reactions will not occur. Hazardous reactions or instability may occur under certain conditions of storage or use.

Section 11. Toxicological Information

Information on Toxicological Effects

Acute Toxicity:	No specific data available.
Irritation/Corrosion:	No specific data available. Product may be expected to be irritating to the skin, eyes and exposed mucous membranes.
Sensitization:	No specific data available.
Germ Cell Mutagenicity:	May cause genetic defects.

Hexamethylphosphorous triamide

Safety Data Sheet

Section 11. Toxicological Information

Carcinogenicity

Component	CAS No	ACGIH	IARC	NTP	OSHA
Hexamethylphosphoramide	680-31-9	A3	Group 2B	RAHC	Not listed

Reproductive Toxicity:

No specific data available.

Teratogenicity:

No specific data available.

Specific Target Organ Toxicity: (Single Exposure)

Respiratory tract irritation.

Specific Target Organ Toxicity: (Repeated Exposure)

No specific data available.

Aspiration Hazard:

No specific data available.

Information on the Likely Routes of Exposure

Common routes of exposure: inhalation, dermal (failure to use skin protection), eye (failure to use safety eyewear). Less common: ingestion (failure to employ recommended hygiene measures (e.g. smoking or eating after handling product without washing hands or using hand protection)).

Additional Information:

To the best of our knowledge, the chemical, physical and toxicological properties of this product have not been thoroughly investigated.

Section 12. Ecological Information

Ecotoxicity:

No specific data regarding this product's impact on the environment was identified.

Numerical Measures of Toxicity

Component	CAS No	Test	Species	Dose	Exposure
Hexamethylphosphoramide	680-31-9	LC50	Lepomis macrochirus (Bluegill)	7,240 mg/l	96 h
		EC50	Daphnia magna (Water flea)	6,670 mg/l	48 h

Persistence and Degradability

Biodegradability:

No specific data available.

Bioaccumulative Potential:

Hexamethylphosphoramide

Species: Cyprinodon variegatus (sheepshead minnow).

Bioconcentration factor (BCF): 3.3

Exposure time: 33 d

Concentration: 40.4 mg/l.

Hexamethylphosphorous triamide

Safety Data Sheet

Section 12. Ecological Information

Mobility in Soil:	No specific data available.
Results of PBT and vPvB Assessment:	PBT/vPvB assessment not available as chemical safety assessment not required/not conducted.
Endocrine Disrupting Properties:	No specific data available.
Other Adverse Effects:	An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Section 13. Disposal Considerations

Waste Treatment Methods

Product:	Dispose of in accordance with local, state, and federal regulations. Refer to 40 CFR 260-299 for complete waste disposal regulations. Consult your local, state, or federal agency before disposing of any chemicals.
Contaminated Packaging:	Empty containers retain product residue (liquids and vapors) and can be dangerous. Dispose of as unused product. DO NOT EXPOSE OPENED/EMPTY CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION; THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

Section 14. Transport Information

Section 15. Regulatory Information

Toxic Substance Control Act (TSCA)

This product as supplied is listed as "Active" on the U.S. Toxic Substances Control Act Chemical Inventory (TSCA Inventory).

This product as supplied is not subject to the TSCA Significant New Use Rule.

This product as supplied is not subject to TSCA 12(b) export notification requirements.

SARA 302 Components

This product does not contain any components which are subject to the reporting requirements of SARA Title III, Section 302 EHS TPQ.

SARA 304 Components

This product does not contain any components which are subject to the reporting requirements of SARA Title III, Section 304 RQ.

SARA 311/312 Hazards

Fire Hazard (Highly Flammable Liquid); Acute Health Hazard (Skin Corrosion; Serious Eye Damage; Specific Target Organ Toxicity - Single Exposure (Respiratory Tract Irritation)); Chronic Health Hazard (Germ cell mutagenicity; Carcinogenicity).

SARA 313 Components

Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). This product contains a chemical or chemicals which are subject to the reporting requirements of the Act and Title 40 of the Code of Federal Regulations, Part 372.
