**EREZTECH LLC**

# SAFETY DATA SHEET

## Section 1. Identification

**Product Name:** [Sodium bis\(trimethylsilylamide\)](#)  
**Product Type:** Solid  
**CAS Number:** 1070-89-9  
**Product Number:** SI0899  
**Recommended Use:** Laboratory chemicals, synthesis of substances.  
**Product Manufacturer:** Ereztech LLC  
11555 Medlock Bridge Road, Suite 100  
Johns Creek, GA 30097  
**Product Information:** (888) 658-1221  
**In Case of an Emergency:** CHEMTREC: 1-800-424-9300 (USA);  
+1 703-527-3887 (International); CCN836180  
\*\*\* Contact manufacturer for all non-emergency calls.

## Section 2. Hazards Identification

**Appearance/Odor:** White to off-white odorless powder.  
**Classification:** ACUTE TOXICITY, ORAL - Category 4, H302  
ACUTE TOXICITY, DERMAL - Category 4, H312  
SKIN CORROSION/IRRITATION - Category 1B, H314  
SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1, H318  
ACUTE TOXICITY, INHALATION - Category 4, H332  
HAZARDOUS TO THE AQUATIC ENVIRONMENT, LONG-TERM  
HAZARD – Category 3, H412

### GHS Label Elements

#### Hazard Pictograms:

**Signal Word:** DANGER  
**Hazard Statements:** H302 + H312 + H332: Harmful if swallowed, in contact with skin or if inhaled.  
H314: Causes severe skin burns and eye damage.  
H318: Causes serious eye damage.

# Sodium bis(trimethylsilylamide)

## Safety Data Sheet

### Section 2. Hazards Identification

<b>Hazard Statements (cont.):</b>	H412: Harmful to aquatic life with long lasting effects.
<b><u>Precautionary Statements</u></b>	
<b>Prevention:</b>	P260: Do not breathe dusts, aerosols, vapors or gases. P264 + P265: Wash hands and exposed skin thoroughly after handling. Do not touch eyes. P270: Do not eat, drink or smoke when using this product. P271: Use only outdoors or with adequate ventilation. P273: Avoid release to the environment. P280: Wear protective gloves/protective clothing/eye protection/face protection.
<b>Response:</b>	P301 + P317: IF SWALLOWED: Get medical help. P301 + P330 + P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. P302 + P361 + P354: IF ON SKIN: Take off immediately all contaminated clothing. Immediately rinse with water for several minutes. P304 + P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing. P305 + P354 + P338: IF IN EYES: Immediately rinse with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P316: Get emergency medical help immediately. P330: Rinse mouth. P362 + P364: Take off contaminated clothing and wash it before reuse.
<b>Storage:</b>	P405: Store locked up.
<b>Disposal:</b>	P501: Dispose of contents/container in accordance with federal, state and local regulations.
<b>OSHA/HCS Status:</b>	This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
<b>Hazards Not Otherwise Classified (HNOC):</b>	Reacts violently with water.

### Section 3. Composition/Information on Ingredients

<b>Substance Type:</b>	Mono-constituent.
<b>Synonyms:</b>	Hexamethyldisilazane sodium salt; Sodium Hexamethyldisilazide; Sodium 1,1,1,3,3,3-hexamethyldisilazan-2-ide; NaHMDS.
<b>Formula:</b>	$C_6H_{18}NNaSi_2$
<b>Molecular Weight:</b>	183.37 g/mol.
<b>EC-No.:</b>	213-983-8

# Sodium bis(trimethylsilylamide)

## Safety Data Sheet

### Section 3. Composition/Information on Ingredients

Component Name	%	CAS Number
<a href="#">Sodium bis(trimethylsilylamide)</a>	≥ 95	1070-89-8

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First Aid Measures

#### Description of Necessary First Aid Measures

- General Advice:** Move out of dangerous area. Get emergency medical help immediately. Show this safety data sheet to the doctor in attendance. If unconscious, place in recovery position and get medical help immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
- Eye Contact:** Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Rinse for a minimum of 15 minutes. Check for and remove any contact lenses after initial rinse period and continue rinsing for an additional 15 minutes. Keep eyes wide open during rinsing process. Get emergency medical help immediately.
- Skin Contact:** Remove all contaminated clothing and shoes. Wash off contaminated skin with plenty of water for a minimum of 15 minutes. Thoroughly clean and dry contaminated clothing before reuse. Destroy/discard contaminated shoes. In the event of complaints or symptoms, avoid further exposure. Get emergency medical help immediately.
- Inhalation:** Rescuer should wear a mask or self-contained breathing apparatus if it is suspected that fumes or gases are still present. Remove person to fresh air and keep comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Do not use the mouth-to-mouth method of resuscitation if victim ingested or inhaled the product; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical devices. Get emergency medical help immediately.
- Ingestion:** Rinse mouth, and then give water to drink (two glasses at most). Do NOT induce vomiting. Remove dentures if any. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If person is not breathing, if breathing is irregular or if respiratory arrest occurs, see the "Inhalation" first aid measures noted above. Get emergency medical help immediately.

# Sodium bis(trimethylsilylamide)

## Safety Data Sheet

### Section 4. First Aid Measures

#### Most Important Symptoms/Effects, Acute and Delayed Potential Acute Health Effects

- Eye Contact:** Product causes serious eye damage. Symptoms may include watering, redness, pain, swelling of the eyelids, inability to keep eye open, blurred vision and temporary/permanent loss of vision.
- Skin Contact:** Skin contact with this product may be expected to cause severe chemical burns. Symptoms may include reddening of skin, a burning or itching sensation, pain, blistering and tissue necrosis.
- Inhalation:** Product is extremely corrosive to mucous membranes and tissues of the upper respiratory tract. Symptoms may include a burning sensation, coughing, coughing up blood (hemoptysis), wheezing, laryngitis, shortness of breath/difficulty in breathing (dyspnea), blueness (cyanosis) of lips and skin, nausea, headaches, disorientation, general weakness and loss of consciousness.
- Ingestion:** Ingestion may be expected to result in burns of the mouth and throat and potential perforation of the esophagus and stomach. Symptoms may include pain when swallowing (odynophagia), difficulty swallowing (dysphagia), fever, nausea, recurrent vomiting (emesis) and vomiting of blood (hematemesis). Severe burns which may be accompanied by perforation of the esophagus and stomach may present additional symptoms of abdominal pain/rigidity, chest and/or back pain.

#### Indication of Immediate Medical Attention and Special Treatment Needed, If Necessary

- Notes to Physician:** Treat symptomatically.
- Specific Treatments:** No specific treatment.
- Protection of First Responders:** No action taken shall be taken involving any personal risk without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See Toxicological Information (Section 11)

### Section 5. Fire Fighting Measures

- General Hazards:** Product reacts violently with water to release highly flammable liquids and gases.
- Suitable Extinguishing Media:** THE MOST EFFECTIVE FIRE EXTINGUISHING AGENT IS DRY CHEMICAL POWDER PRESSURIZED WITH NITROGEN. Carbon dioxide (CO<sub>2</sub>) may also be used.
- Unsuitable Extinguishing Media:** DO NOT USE WATER OR FOAM.
- Unusual Fire and Explosion Hazards:** Product reacts violently with water and protic solvents to release highly flammable gases. Gases released may form explosive mixtures with air. Product runoff to sewer may create a fire or explosion hazard.

# Sodium bis(trimethylsilylamide)

## Safety Data Sheet

### Section 5. Fire Fighting Measures

**Unusual Fire and Explosion Hazards (cont.):**

Gases released when product is exposed to water are heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to an ignition source and flashback.

**Product of Combustion:**

Carbon oxides (CO<sub>x</sub>), nitrogen oxides (NO<sub>x</sub>) and silicon dioxide. Irritating fumes and organic acid vapors may be generated during exposure to elevated temperatures or open flame.

**Protection of Firefighters:**

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Prevent contact with skin or eyes. Prevent the formation and inhalation of dusts, aerosols, vapors and gases.

Eliminate all local and distant ignition sources. Stop spillage and move unopened containers from fire area if process can be accomplished without risk to firefighters. To reduce the possibility of explosion, use a water spray or fog to reduce direct vapors and to cool unopened containers. Do not apply water directly to product.

Fire-fighters should wear appropriate protection equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in a positive pressure mode.

**Additional Information:**

Prevent fire extinguishing water from contaminating surface waters or ground water systems.

### Section 6. Accidental Release Measures

**Personal Precautions, Protective Equipment and Emergency Procedures**

**For Non-Emergency Personnel:**

No action shall be taken involving any personal risk or without suitable training. Beware of vapors accumulating in low areas to form explosive concentrations. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment. Prevent contact with skin, eyes or clothing. Prevent the formation and inhalation of dusts, aerosols, vapors and gases. Provide adequate ventilation or wear respiratory protection.

**For Emergency Responders:**

If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For Non-Emergency Personnel".

# Sodium bis(trimethylsilylamide)

## Safety Data Sheet

### Section 6. Accidental Release Measures

#### Environmental Precautions:

Prevent spilled material and firefighting runoff from entering the surrounding environment (soil contact, entry into drains, sewers and waterways). Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

#### Methods for Containment

##### General:

Stop spillage and move unopened containers from spill area if safe to do so. Prevent the formation and inhalation of dusts, aerosols, vapors and gases. Do not allow the spilled material to get wet or the use water to clean up spillages or residues. Dispose of collected spillage in accordance with federal, state and local regulations. Contaminated binding material may pose the same hazard as the spilled product.

##### Small Spill:

Collect spillage with a dry, non-combustible, binding material (e.g. dry sand, vermiculite or diatomaceous earth) and place in dry, sealed container for disposal.

##### Large Spill:

Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with a dry, non-combustible, binding material (e.g. dry sand, vermiculite or diatomaceous earth) and place in dry, sealed container for disposal.

Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

### Section 7. Handling and Storage

#### Precautions:

Product is air sensitive and reacts violently with water to release highly flammable liquids and gases; handle under a dry, inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended. Keep container tightly sealed. Prevent contact with skin, eyes and clothing. Do not ingest. Prevent the formation and inhalation of dusts, aerosols, vapors and gases. Avoid prolonged exposure. Ensure adequate ventilation or wear respiratory protection.

#### Protective Measures:

Put on appropriate personal protective equipment (see Section 8). Keep in the original container kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

#### General Occupational Hygiene:

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed.

# Sodium bis(trimethylsilylamide)

## Safety Data Sheet

### Section 7. Handling and Storage

#### General Occupational Hygiene: (cont.)

Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

#### Safe Storage Conditions:

Product is air sensitive and reacts violently with water to release highly flammable liquids and gases; store under an inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen and a temperature range of 2 – 8 °C is recommended. Keep away from all sources of ignition – NO SMOKING. Store in original container protected from direct sunlight in a dry and well-ventilated area, away from incompatible materials and food and drink. Keep container tightly closed and sealed until ready for use. Store locked up.

### Section 8. Exposure Controls/Personal Protection

#### Introductory Remarks:

These recommendations provide general guidance for handling this product. Because work environments and material handling practices vary, safety procedures should be developed for each intended application. While developing safe handling procedures, do not overlook the need to clean equipment and conduct regular repairs. Waste from these procedures should be handled in accordance with Section 13.

#### Occupational Exposure Limits:

Product, as supplied, does not contain any hazardous materials with occupational exposure limits established by the region specific regulatory bodies.

#### Engineering Controls:

Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Provide an eyewash/shower station.

#### Environmental Exposure Controls:

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

#### Individual Protection Measures

##### Hygiene Measures:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Remove all soiled and contaminated clothing immediately. Do not inhale dusts, aerosols or gases. Prevent contact with eyes and skin.

# Sodium bis(trimethylsilylamide)

## Safety Data Sheet

### Section 8. Exposure Controls/Personal Protection

#### Hygiene Measures (cont.):

Ensure that eyewash stations and safety showers are close to the workstation location.

#### Eye/Face Protection:

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to dusts and aerosols. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles, faceshield (8-inch minimum). Refer to 29 CFR 1910.133, ANSI Z87.1, or European Standard EN166.

#### Skin Protection

#### Hand Protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: Chemical-resistant gloves.

Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. For full contact, wear Neoprene or nitrile rubber gloves.

#### Other Skin Protection:

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

#### Respiratory Protection:

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multipurpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

# Sodium bis(trimethylsilylamide)

## Safety Data Sheet

### Section 9. Physical and Chemical Properties

<b>Physical State:</b>	Solid (powder or chunks).
<b>Color:</b>	White to off-white.
<b>Odor:</b>	Odorless.
<b>Odor Threshold:</b>	No data available.
<b>pH:</b>	No data available.
<b>Melting Point:</b>	171 - 175 °C (339.8 - 347 °F).
<b>Boiling Point:</b>	202 °C (396 °F) @ 1 - 3 hPa.
<b>Flash Point:</b>	Not applicable.
<b>Auto-ignition Temperature:</b>	No data available.
<b>Density:</b>	No data available.
<b>Vapor Pressure:</b>	No data available.
<b>Vapor Density:</b>	No data available.
<b>Water Solubility:</b>	Reacts violently to release highly flammable liquids and gases.
<b>Evaporation Rate:</b>	Not applicable.
<b>Viscosity:</b>	Not applicable.

### Section 10. Stability and Reactivity

<b>Reactivity:</b>	This product reacts violently with moisture in air, water and protic solvents to release highly flammable gases.
<b>Chemical Stability:</b>	This product is stable when stored under a dry, inert atmosphere and away from heat. Nitrogen containing less than 5 ppm each moisture and air and a temperature range of 2 – 8 °C is recommended.
<b>Conditions to Avoid:</b>	Keep away from air, moisture, water, protic solvents, heat, sources of ignition and incompatible materials.
<b>Incompatible Materials:</b>	Strong acids and strong oxidizing agents.
<b>Hazardous Decomposition Products:</b>	Bis(trimethylsilyl)amine, carbon oxides (CO <sub>x</sub> ), nitrogen oxides (NO <sub>x</sub> ) and silicone dioxide. Irritating and potentially toxic fumes may be generated during exposure to elevated temperatures or open flame. In the event of a fire: see Section 5.
<b>Possibility of Hazardous Reactions:</b>	Under normal conditions of storage and use noted above, hazardous reactions will not occur. Hazardous reactions or instability may occur under certain conditions of storage or use. In contact with water, product reacts violently to release highly flammable liquids and gases.

# Sodium bis(trimethylsilylamide)

## Safety Data Sheet

### Section 11. Toxicological Information

#### Information on Toxicological Effects

##### Acute Toxicity

Component	CAS No	Result	Species	Dose	Exposure
Sodium bis(trimethylsilylamide)	1070-89-9	LC50 Inhalation	Rat	10.3 mg/l	4 h
		LD50 Dermal	Rabbit	1,350 mg/kg	-

##### Irritation/Corrosion

Component	Tissue	Test	Result	Remarks
Sodium bis(trimethylsilylamide)	In vitro membrane barrier	Skin corrosion - OECD Test Guideline 435	Causes burns	Causes skin burns

##### Sensitization:

No specific data available.

##### Germ Cell Mutagenicity

Component	Species	Test	Result	Remarks
Sodium bis(trimethylsilylamide)	Salmonella typhimurium	Ames test - OECD Test Guideline 471	Negative	With and without metabolic activation.

##### Carcinogenicity

Component	CAS No	ACGIH	IARC	NTP	OSHA
Sodium bis(trimethylsilylamide)	1070-89-9	Not listed	Not listed	Not listed	Not listed

##### Reproductive Toxicity:

No specific data available.

##### Teratogenicity:

No specific data available.

##### Specific Target Organ Toxicity: (Single Exposure)

No specific data available.

##### Specific Target Organ Toxicity: (Repeated Exposure)

No specific data available.

##### Aspiration Hazard:

No specific data available.

##### Information on the Likely Routes of Exposure:

Common routes of exposure: inhalation (failure to prevent dust formation), dermal (failure to use skin protection), eye (failure to use safety eyewear). Less common: ingestion (failure to employ recommended hygiene measures (e.g. smoking after handling product without washing hands or using hand protection)).

##### Additional Information:

To the best of our knowledge, the chemical, physical and toxicological properties of this product have not been thoroughly investigated.

# Sodium bis(trimethylsilylamide)

## Safety Data Sheet

### Section 12. Ecological Information

<b>Ecotoxicity:</b>	Product is harmful to aquatic organisms and may cause long-term adverse effects in the aquatic environment.
<b>Numerical Measures of Toxicity:</b>	No specific data available.
<b><u>Persistence and Degradability</u></b>	
<b>Biodegradability:</b>	No specific data available.
<b>Bioaccumulative Potential:</b>	No specific data available.
<b>Persistence:</b>	Based on the product's rapid decomposition in the presence of water, the probability of the product persisting in the environment is deemed very low.
<b>Mobility in Soil:</b>	The probability of the product being mobile in the environment is low based its rapid decomposition in the presence of water
<b>Results of PBT and vPvB Assessment:</b>	PBT/vPvB assessment not available as chemical safety assessment not required/not conducted.
<b>Endocrine Disrupting Properties:</b>	No specific data available.
<b>Other Adverse Effects:</b>	An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

### Section 13. Disposal Considerations

#### Waste Treatment Methods

<b>Product:</b>	Dispose of in accordance with local, state, and federal regulations. Refer to 40 CFR 260-299 for complete waste disposal regulations. Consult your local, state, or federal agency before disposing of any chemicals.
<b>Contaminated Packaging:</b>	Empty containers retain product residue (dusts, aerosols, gases) and can be dangerous. Dispose of as unused product.

# Sodium bis(trimethylsilylamide)

**Special Precautions for User:** Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

### Section 15. Regulatory Information

#### Toxic Substance Control Act (TSCA)

This product as supplied is listed as "Active" on the U.S. Toxic Substances Control Act Chemical Inventory (TSCA Inventory).

This product as supplied is not subject to the TSCA Significant New Use Rule.

This product as supplied is not subject to TSCA 12(b) export notification requirements.

#### SARA 302 Components

This product does not contain any components which are subject to the reporting requirements of SARA Title III, Section 302 EHS TPO.

#### SARA 304 Components

This product does not contain any components which are subject to the reporting requirements of SARA Title III, Section 304 RQ.

#### SARA 311/312 Hazards

Acute Health Hazard (Acute toxicity: oral, dermal, inhalation; Skin corrosion or irritation; Serious eye damage or eye irritation).

#### SARA 313 Components

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

#### Clean Water Act

Not applicable.
