SAFETY DATA SHEET

Section 1. Identification

Product Name: Tricyclohexyltin chloride
Product Type: Solid
CAS Number: 3091-32-5
Product Number: SN1325
Recommended Use: Laboratory chemicals, synthesis of substances.
Product Manufacturer: Ereztech LLC
11555 Medlock Bridge Road, Suite 100
Johns Creek, GA 30097

Product Information: (888) 658-1221
In Case of an Emergency: CHEMTREC: 1-800-424-9300 (USA);
+1 703-527-3887 (International); CCN836180
*** Contact manufacturer for all non-emergency calls.

Section 2. Hazards Identification

Appearance/Odor: White powder, odor not determined.
Classification: ACUTE TOXICITY; ORAL – Category 4, H302
ACUTE TOXICITY; DERMAL – Category 4, H312
ACUTE TOXICITY; INHALATION – Category 4, H332
HAZARDOUS TO THE AQUATIC ENVIRONMENT, ACUTE TOXICITY – Category 1, H400
HAZARDOUS TO THE AQUATIC ENVIRONMENT, CHRONIC TOXICITY – Category 1, H410

GHS Label Elements
Hazard Pictograms:

Signal Word: WARNING
Hazard Statements: H302 + H312 + H332: Harmful if swallowed, in contact with skin or if inhaled.
H400: Very toxic to aquatic life.
H410: Very toxic to aquatic life with long lasting effects.

Section 2. Hazards Identification

Precautionary Statements

Prevention:

P261: Avoid breathing dusts, aerosols, vapors and gases.
P264: Wash hands and exposed skin thoroughly after handling.
P270: Do not eat, drink or smoke when using this product.
P271: Use only outdoors or with adequate ventilation.
P273: Avoid release to the environment.
P280: Wear protective gloves/protective clothing.

Response:

P301 + P317: IF SWALLOWED: Get medical help.
P302 + P352: IF ON SKIN: Wash with plenty of water.
P304 + P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P317: Get medical help.
P330: Rinse mouth.
P362 + P364: Take off contaminated clothing and wash it before reuse.
P391: Collect spillage.

Storage: No applicable statements.

Disposal: P501: Dispose of contents/container in accordance with federal, state and local regulations.

OSHA/HCS Status: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200, 2024).

Hazards Not Otherwise Classified (HNOC): None identified.

Section 3. Composition/Information on Ingredients

Substance Type: Mono-constituent.
Synonyms: Chloro(tricyclohexyl)stannane; Chlorotricyclohexyltin; Cy3SnCl.
Formula: $C_{18}H_{33}SnCl$
Molecular Weight: 403.62 g/mol.
EC-No. : 221-437-5

Component Name	%	CAS Number
Tricyclohexyltin chloride	≥ 95	3091-32-5

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First Aid Measures

Description of Necessary First Aid Measures

General Advice: Move out of dangerous area. Get medical help. Show this safety data sheet to the doctor in attendance. If unconscious, place in recovery position and get medical help immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Eye Contact: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses if easy to do. Continue rinsing. Get medical help if irritation develops and persists, if symptoms develop or if you feel unwell.

Skin Contact: Take off contaminated clothing and shoes immediately. Wash off exposed skin with plenty of water. Get medical help.

Inhalation: Rescuer should wear a mask or self-contained breathing apparatus if it is suspected that dusts, aerosols or gases are still present. Remove person to fresh air and keep comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Do not use the mouth-to-mouth method of resuscitation if victim ingested or inhaled the product; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical devices. Get medical help.

Ingestion: Rinse mouth, and then give water to drink (two glasses at most). Do NOT induce vomiting. Remove dentures if any. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If person is not breathing, if breathing is irregular or if respiratory arrest occurs, see the "Inhalation" first aid measures noted above. Get medical help.

Most Important Symptoms/Effects, Acute and Delayed Potential Acute Health Effects

Eye Contact: Symptoms may include stinging, tearing, redness, swelling and blurred vision.

Skin Contact: Product is harmful in contact with skin. Symptoms may include an itching or burning sensation, reddening, swelling and potential absorption of product.

Inhalation: Product is harmful if inhaled. Symptoms may include coughing, sneezing with phlegm production, sore throat, nausea, headache, vomiting.

Ingestion: Product is harmful if ingested and may be expected to be irritating to mucous membranes. Symptoms may include cramping, localized pain, headache, nausea and vomiting

Indication of Immediate Medical Attention and Special Treatment Needed, If Necessary

Notes to Physician: Poisoning by the product may initially be asymptomatic. See Section 11 for additional information.

Specific Treatments: No specific treatment.

Section 4. First Aid Measures

Protection of First Responders: No action taken shall be taken involving any personal risk without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See Toxicological Information (Section 11)

Section 5. Fire Fighting Measures

General Hazards: None identified.

Suitable Extinguishing Media: Use extinguishing measures and media that are appropriate to the local circumstances and the surrounding environment.

Unsuitable Extinguishing Media: For this product no limitations of extinguishing agents are given.

Unusual Fire and Explosion Hazards: None identified.

Products of Combustion: Carbon oxides (CO_X), hydrogen chloride and tin oxide fumes. Irritating/toxic fumes and organic acid vapors may be generated during exposure to elevated temperatures or open flame.

Protection of Firefighters: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Avoid contact with skin, eyes and clothing and the formation and inhalation of dusts, aerosols, vapors and gases.

Stop spillage and move unopened containers from fire area if process can be accomplished without risk to firefighters. Do not attempt to move heated containers. To reduce the possibility of explosion, use a water spray or fog to reduce direct vapors and to cool unopened containers.

Fire-fighters should wear appropriate protection equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in a positive pressure mode.

Additional Information: Prevent fire extinguishing materials and runoff from contaminating surface waters or ground water systems.

Section 6. Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures

For Non-Emergency Personnel: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering.

Section 6. Accidental Release Measures

For Non-Emergency Personnel: (cont.)

Do not touch or walk through spilled material. Put on appropriate personal protective equipment. Avoid contact with skin, eyes or clothing and the formation and inhalation of dusts, aerosols, vapors and gases. Provide adequate ventilation or wear respiratory protection.

For Emergency Responders:

If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For Non-Emergency Personnel".

Environmental Precautions:

Prevent spilled material and firefighting runoff from entering the surrounding environment (soil contact, entry into drains, sewers and waterways). Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods for Containment

General:

Stop spillage and move unopened containers from spill area if safe to do so. Do not attempt to move heated containers. Avoid the formation and inhalation of dusts, aerosols, vapors and gases. Dispose of collected spillage in accordance with federal, state and local regulations. Contaminated binding material may pose the same hazard as the spilled product.

Small Spill:

Collect spillage with a dry, binding material (e.g. dry sand, vermiculite or diatomaceous earth) and place in dry, sealed container for disposal.

Large Spill:

Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with a dry, binding material (e.g. dry sand, vermiculite or diatomaceous earth) and place in dry, sealed container for disposal.

Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and Storage

Precautions:

Product is moisture sensitive; handle under a dry, inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended. Keep container tightly sealed. Avoid contact with skin, eyes and clothing and the formation and inhalation of dusts, aerosols, vapors and gases. Do not ingest. Avoid prolonged exposure. Ensure adequate ventilation or wear respiratory protection.

Section 7. Handling and Storage

Protective Measures: Put on appropriate personal protective equipment (see Section 8). Keep in the original container kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

General Occupational Hygiene: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Safe Storage Conditions: Product is moisture sensitive; store under an inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended. Store in original container protected from direct sunlight in a dry and well-ventilated area, away from incompatible materials and food and drink. Keep container tightly closed and sealed until ready for use.

Section 8. Exposure Controls/Personal Protection

Introductory Remarks: These recommendations provide general guidance for handling this product. Because work environments and material handling practices vary, safety procedures should be developed for each intended application. While developing safe handling procedures, do not overlook the need to clean equipment and conduct regular repairs. Waste from these procedures should be handled in accordance with Section 13.

Occupational Exposure Limits

Components	CAS-No.	List	Type	Value
Tricyclohexyltin chloride	3091-32-5	ACGIH	TLV	0.1 mg/m^3 Sn TWA 0.2 mg/m^3 Sn STEL
		CA Title 8	Article 107	0.1 mg/m^3 Sn PEL 0.2 mg/m^3 Sn STEL
		NIOSH	REL	0.1 mg/m^3 TWA 25 mg/m^3 Sn IDLH
		OSHA Z1	PEL	0.1 mg/m^3 Sn TWA

Engineering Controls: Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Provide an eyewash/shower station.

Section 8. Exposure Controls/Personal Protection

Environmental Exposure Controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual Protection Measures

Hygiene Measures: Avoid all unnecessary exposure. Wash all exposed skin (hands, forearms and face) thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Remove all soiled and contaminated clothing immediately. Avoid contact with eyes, skin and clothing and the formation and inhalation of dusts, aerosols, vapors and gases. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/Face Protection: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to dusts and aerosols. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles, faceshield (8-inch minimum). Refer to 29 CFR 1910.133, ANSI Z87.1, or European Standard EN166.

Skin Protection

Hand Protection: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: Chemical-resistant gloves.

Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. For full contact, wear gloves made from Neoprene or nitrile rubber.

Section 8. Exposure Controls/Personal Protection

Other Skin Protection: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Each person who is reasonably likely to be dermally exposed should wear dermal personal protective equipment impervious to the chemical substance, selected and used in accordance with the OSHA requirements at 29 CFR 1910.132, 1910.133, and 1910.138.

Respiratory Protection: Where risk assessment shows air-purifying respirators are appropriate, each person who is reasonably likely to be exposed to the chemical substance by inhalation should wear NIOSH-approved APF 1000 respirator in accordance with 29 CFR 1910.134 and 42 CFR part 84. If the respirator is the sole means of protection, use a full-face supplied air respirator.

Section 9. Physical and Chemical Properties

Physical State:	Solid.
Color:	White powder.
Odor:	No data available.
Odor Threshold:	No data available.
pH:	No data available.
Melting Point:	123 – 125 °C (253 – 257 °F) – lit.
Boiling Point:	No data available.
Flash Point:	No data available.
Auto-ignition Temperature:	No data available.
Relative Density:	No data available.
Vapor Pressure:	No data available.
Vapor Density:	No data available.
Water Solubility:	Insoluble.

Section 10. Stability and Reactivity

Reactivity: Based on available information, no reactivity hazards have been identified for this product.

Chemical Stability: This product is stable when stored under a dry, inert atmosphere and away from heat. Nitrogen containing less than 5 ppm each moisture and air is recommended.

Section 10. Stability and Reactivity

Conditions to Avoid: Exposure to water/moisture, extremes of temperature and direct sunlight.

Incompatible Materials: Strong oxidizing agents.

Hazardous Decomposition Products: Carbon oxides (CO_X), hydrogen chloride, tin oxide fumes and organic acid vapors.

Possibility of Hazardous Reactions: Under normal conditions of storage and use noted above, hazardous reactions will not occur. Hazardous reactions or instability may occur under certain conditions of storage or use.

Section 11. Toxicological Information

Information on Toxicological Effects

Acute Toxicity

Component	CAS No	Result	Species	Dose	Exposure
Tricyclohexyltin chloride	3091-32-5	LD50 Oral	ATE	500.1 mg/kg	-
		LD50 Dermal	ATE	1,100 mg/kg	-
		LC50 Inhalation	ATE	1.5 mg/l (dust/mist)	4 h

Irritation/Corrosion: No specific data available.

Sensitization: No specific data available.

Germ Cell Mutagenicity: No specific data available.

Carcinogenicity

Component	CAS No	ACGIH	IARC	NTP	OSHA
Tricyclohexyltin chloride	3091-32-5	Not listed	Not listed	Not listed	Not listed

Reproductive Toxicity: No specific data available.

Teratogenicity: No specific data available.

Specific Target Organ Toxicity: (Single Exposure) No specific data available.

Specific Target Organ Toxicity: (Repeated Exposure) No specific data available.

Aspiration Hazard: No specific data available.

Information on the Likely Routes of Exposure: Common routes of exposure: inhalation (failure to prevent dust formation); dermal (failure to use skin protection); eye (failure to use safety eyewear).

Section 11. Toxicological Information

Information on the Likely Routes of Exposure (cont.): Less common: ingestion (failure to employ recommended hygiene measures (e.g. smoking or eating after handling product without washing hands or using hand protection).

Additional Information: General signs of toxicity for overexposure to tetraalkyl tin compounds include muscular weakness and paralysis, leading to respiratory failure, tremors, convulsive movements, closure of the eyelids, and photophobia.

Histologically, tetraalkyl tin compounds show a decrease in cytoplasmic basophilia of the liver, chromatolysis of the Purkinje cells of the cerebellum, and increase in the water content of the brain and spinal cord. Product may cause adverse liver effects and adverse effects on the bone marrow and blood-forming systems. Organs/systems which may be affected by exposure include central nervous system (CNS), respiratory system, skin, eyes, blood, liver, kidneys and urinary tract.

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

Section 12. Ecological Information

Ecotoxicity: Product is very toxic to aquatic organisms and may cause long-term adverse effects in the aquatic environment.

Numerical Measures of Toxicity: No specific data available.

Persistence and Degradability

Biodegradability: No specific data available.

Bioaccumulative Potential: No specific data available.

Persistence: Based on the product's insolubility in water, there is a high probability of the product persisting in the environment.

Mobility in Soil: The probability of the product being mobile in the environment is low based its insolubility in water.

Results of PBT and vPvB Assessment: PBT/vPvB assessment not available as chemical safety assessment not required/not conducted.

Endocrine Disrupting Properties: No specific data available.

Other Adverse Effects: An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Section 13. Disposal Considerations

Waste Treatment Methods

Product: Dispose of in accordance with local, state, and federal regulations. Refer to 40 CFR 260-299 for complete waste disposal regulations. Consult your local, state, or federal agency before disposing of any chemicals.

Contaminated Packaging: Empty containers retain product residue (dusts and/or aerosols) and can be dangerous. Dispose of in the same manner as unused product.

Section 14. Transport Information

	DOT	IMDG	IATA
UN Number	UN3146	UN3146	UN3146
UN Proper Shipping Name	Organotin compounds, solid, n.o.s. (Tricyclohexyltin chloride)	ORGANOTIN COMPOUNDS, SOLID, N.O.S. (Tricyclohexyltin chloride)	Organotin compounds, solid, n.o.s. (Tricyclohexyltin chloride)
Transport Hazard Classes	6.1	6.1	6.1
Packing Group	III	III	III
Environmental Hazards	Yes	Yes	Yes
Additional Information	-	EMS No: F-A, S-A	-

Special Precautions for User: Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Section 15. Regulatory Information

Toxic Substance Control Act (TSCA)

This product as supplied is listed as "Active" on the U.S. Toxic Substances Control Act Chemical Inventory (TSCA Inventory).

This product as supplied is not subject to the TSCA Significant New Use Rule.

This product as supplied is not subject to TSCA 12(b) export notification requirements.

SARA 302 Components

This product does not contain any components which are subject to the reporting requirements of SARA Title III, Section 302 EHS TPQ.

Section 15. Regulatory Information

SARA 304 Components
This product does not contain any components which are subject to the reporting requirements of SARA Title III, Section 304 RQ.

SARA 311/312 Hazards
Acute Health Hazard (Acute Toxicity – Ingestion, Inhalation, Dermal)

SARA 313 Components
This product does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

Clean Water Act
This product does not contain any toxic pollutants listed under the U.S. Clean Water Act Section 307.

This product does not contain any priority pollutants related to the U.S. Clean Water Act.

Clean Air Act
Not applicable.

CERCLA Reportable Quantity
This product, as supplied, does not contain any substances regulated as hazardous substances under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) (40 CFR 302) or the Superfund Amendments and Reauthorization Act (SARA) (40 CFR 355). There may be specific reporting requirements at the local, regional, or state level pertaining to releases of this material.

US Department of Homeland Security (DHS)
This product does not contain any DHS chemicals.

US Department of Transportation (DOT)
