

SAFETY DATA SHEET

Section 1. Identification

Product Name:	Titanium(IV) methoxide.
Product Type:	Solid.
CAS Number:	992-92-7.
Product Number:	TI2927
Product Manufacturer:	Ereztech LLC 11555 Medlock Bridge Road, Suite 100 Johns Creek, GA 30097
Product Information:	(888) 658-1221
<u>In case of an emergency:</u>	CHEMTREC: 1-800-424-9300 (USA); +1 703-527-3887 (International); CCN836180 *** Contact manufacturer for all non-emergency calls.

Section 2. Hazards Identification

Emergency Overview

Appearance/Odor:	White powder, odor not determined.
Classification:	FLAMMABLE SOLID – Category 1, H228 ACUTE TOXICITY, ORAL; - Category 4, H302 ACUTE TOXICITY, DERMAL; - Category 4, H312 SKIN CORROSION/IRRITATION; - Category 2, H315 SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1, H318 ACUTE TOXICITY, INHALATION; - Category 3, H331 SPECIFIC ORGAN TOXICITY, SINGLE EXPOSURE; RESPIRATORY TRACT IRRITATION; - Category 3, H335

GHS label elements

Signal word:	DANGER.
Hazard statements:	H228: Flammable solid. H302: Harmful if swallowed. H312: Harmful in contact with skin. H315: Causes skin irritation. H318: Causes serious eye damage. H335: May cause respiratory irritation.

Titanium(IV) methoxide

Safety Data Sheet

Section 2. Hazards Identification

Hazard pictograms:

Precautionary statements

Prevention:

- P210: Keep away from heat/sparks/open flames/hot surfaces. – No smoking.
- P240: Ground/Bond container and receiving equipment.
- P241: Use explosion proof electrical/ventilating/lighting/processing equipment.
- P261: Avoid breathing dust/gas/vapors/fumes.
- P264: Wash skin thoroughly after handling.
- P270: Do not eat, drink or smoke when using this product.
- P271: Use only outdoors or in a well-ventilated area.
- P280: Wear protective gloves/ protective clothing/ eye protection/ face protection.

Response:

- P301 + P312: IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.
- P302 + P352: IF ON SKIN: Wash with plenty of soap and water.
- P304 + P340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
- P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present. Continue rinsing.
- P310: Immediately call a POISON CENTER or doctor/physician.
- P330: Rinse mouth.
- P332 + P313: If skin irritation occurs: Get medical advice/attention.
- P362: Take off contaminated clothing and wash before reuse.
- P370 + P378: IN case of fire: Use CO₂, dry chemical or dry foam for extinction.

Storage:

- P403 + P233: Store in a well ventilated place. Keep container tightly closed.
- P405: Store locked up.

Disposal:

- P501: Dispose of contents/ container to an approved waste disposal plant.

OSHA/HCS status:

This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Hazards not otherwise classified:

Reacts with water to release methanol.

Titanium(IV) methoxide

Safety Data Sheet

Section 3. Composition/Information on Ingredients

Substances

Formula : C₄H₁₂O₄Ti
Molecular weight : 172.00 g/mol.
CAS-No. : 992-92-7.

Ingredient Name	%	CAS Number
Titanium(IV) methoxide	>97	992-92-7

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First Aid Measures

Description of Necessary First Aid Measures

- General Advice:** Move out of dangerous area. Consult a physician. Show this safety data sheet to the doctor in attendance.
- Eye Contact:** Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue rinsing. Call a physician or POISON CONTROL CENTER immediately.
- Skin Contact:** Wash off contaminated skin with soap and plenty of water. Call a physician or POISON CONTROL CENTER immediately.
- Inhalation:** Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. Call a POISON CENTER or doctor/physician immediately.
- Ingestion:** Rinse mouth. Do NOT induce vomiting. Remove dentures if any. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband Call a physician or POISON CONTROL CENTER immediately.

Most Important Symptoms/Effects, Acute And Delayed Potential Acute Health Effects

- Eye Contact:** Symptoms may include stinging/pain, tearing, redness, swelling, and temporary/permanent loss of vision. Methanol formed by hydrolysis of product is damaging to the optic nerve.
- Inhalation:** Symptoms may include burning sensation, shortness of breath, nausea, headache, vomiting and impaired vision. May cause allergy or asthma symptoms or breathing difficulties if inhaled.

Titanium(IV) methoxide

Safety Data Sheet

Section 4. First Aid Measures

- Skin Contact:** Harmful in contact with skin. May cause skin irritation.
- Ingestion:** Harmful if ingested. Symptoms may include nausea, headache, visual disturbances, vomiting and stomach irregularities.
- Chronic:** Product releases methanol on contact with water which is known to have a chronic effect on the Central Nervous System (CNS). Methanol may affect the CNS resulting in persistent or reoccurring headaches or impaired vision.

Indication of Immediate Medical Attention and Special Treatment Needed, If Necessary

Notes to Physician: This product reacts with water in the acid contents of the stomach to form methanol. The combination of visual disturbances, metabolic acidosis and formic acid in urine is evidence of methanol poisoning. The therapeutic intravenous administration of ethanol (10 ml/hour) allows methanol to be preferentially oxidized and reduces production of methanol metabolites. Acidosis must be treated with intravenous administration of sodium bicarbonate and methanol elimination may be increased by hemodialysis, as indicated. Treatment should be based on blood methanol levels and acid-base balance.

Specific Treatments: No specific treatment.

Protection of First Responders: No action taken shall be taken involving any personal risk without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Section 5. Fire Fighting Measures

- General Hazards:** None identified.
- Suitable Extinguishing Media:** Use chemical/dry foam, dry chemical or carbon dioxide (CO₂).
- Unsuitable Extinguishing Media:** Do not use water. Product reacts with water to produce methanol.
- Unusual Fire and Explosion Hazards:** This material reacts with water and compounds containing active hydrogen such as alcohols and acids to release methanol. Product runoff to sewer may create a fire or explosion hazard. Methanol vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to an ignition source and flashback.
- Product of Combustion:** Decomposition products include carbon oxides (CO, CO₂) and titanium oxide.

Titanium(IV) methoxide

Safety Data Sheet

Section 5. Fire Fighting Measures

Protection of Firefighters:

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Avoid contact with skin or eyes. Avoid breathing dusts, aerosols, vapors and gases.

Eliminate all local and distant ignition sources. Move containers from fire area if process can be accomplished without risk to firefighters. To reduce the possibility of explosion, use a water spray or fog to reduce direct vapors and to cool unopened containers. Do not cut, grind, drill or weld on or near product containers (even empty) of this product because an explosion may result.

Fire-fighters should wear appropriate protection equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in a positive pressure mode.

Section 6. Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures

For Non-emergency Personnel:

Eliminate all ignition sources. No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid the formation and inhalation of dusts and aerosols. Provide adequate ventilation. Wear respiratory protection. Put on appropriate personal protective equipment.

For Emergency Responders:

If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel".

Environmental Precautions:

Do not allow dispersal of spilled material and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods for Containment

Small Spill:

Eliminate all ignition sources. Move containers from spill area if safe to do so. Sweep up and place in dry, sealed container for disposal according to local regulations (see Section 13). Avoid contact with water and the creation of dust. Avoid the inhalation of dusts and aerosols.

Titanium(IV) methoxide

Safety Data Sheet

Section 6. Accidental Release Measures

Methods for Containment

Small Spill (cont.):

Avoid allowing the spilled material to get wet or using water to clean up spillages or residues. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor.

Large Spill:

Eliminate all ignition sources. Move containers from spill area if safe to do so. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid allowing the spilled material to get wet or using water to clean up spillages or residues. Use spark-proof tools and explosion-proof equipment. Contain and collect spillage with non-combustible, dry binding material (e.g. sand, earth, vermiculite or diatomaceous earth) and place in dry, sealed container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated binding material may pose the same hazard as the spilled product.

Section 7. Handling and Storage

Precautions:

Product is moisture sensitive. Handle under a dry, inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended. Keep away from heat/sparks/open flames/hot surfaces. NO SMOKING. Take precautions to prevent buildup of static charge. Avoid contact with water. Avoid contact with skin, eyes and clothing. Avoid formation and inhalation of dusts. Do not ingest. Provide adequate ventilation.

Protective Measures:

Put on appropriate personal protective equipment (see Section 8). Keep in the original container kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

General Occupational Hygiene:

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Safe Storage Conditions:

Product is moisture sensitive. Handle and store under an inert gas. Nitrogen with less than 5 ppm each of moisture and oxygen is recommended.

Titanium(IV) methoxide

Safety Data Sheet

Section 7. Handling and Storage

Safe Storage Conditions (cont.): Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (oxidizing agents) and food and drink. Keep container tightly closed and sealed until ready for use. Store locked up.

Section 8. Exposure Controls/Personal Protection

Introductory Remarks: These recommendations provide general guidance for handling this product. Because work environments and material handling practices vary, safety procedures should be developed for each intended application. While developing safe handling procedures, do not overlook the need to clean equipment and conduct regular repairs. Waste from these procedures should be handled in accordance with Section 13.

Occupational Exposure Limits: Product contains no substances with occupational exposure limit values.

Engineering Controls: Properly operating explosion-proof, chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Provide an eyewash/shower station.

Environmental Exposure Controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual Protection Measures

Hygiene Measures: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Remove all soiled and contaminated clothing immediately. Do not inhale dusts or aerosols. Avoid contact with eyes and skin. Do not ingest. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/Face Protection: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to dusts and aerosols.

Titanium(IV) methoxide

Safety Data Sheet

Section 8. Exposure Controls/Personal Protection

Eye/Face Protection (cont.):

If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles, faceshield (8-inch minimum). Refer to 29 CFR 1910.133, ANSI Z87.1, or European Standard EN166.

Skin Protection

Hand Protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: Chemical-resistant gloves. For full contact, wear Neoprene or nitrile rubber gloves.

Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Other Skin Protection:

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory Protection:

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multipurpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Titanium(IV) methoxide

Safety Data Sheet

Section 9. Physical and Chemical Properties

Physical State:	Solid (powder).
Color:	White.
Odor:	No data available.
Odor Threshold:	No data available.
pH:	No data available.
Melting Point:	200 – 210 °C (392 – 410 °F).
Boiling Point:	243 °C (469.4 °F).
Flash Point:	14 °C (57 °F) - closed cup.
Flammability (solid):	No data available.
Specific Gravity:	No data available.
Vapor Pressure:	No data available.
Vapor Density:	No data available.
Water Solubility:	Insoluble. Reacts with water to release methanol.

Section 10. Stability and Reactivity

Reactivity:	No data available.
Chemical Stability:	Stable at normal ambient temperature and pressure and under recommended storage conditions.
Conditions to Avoid:	Heat, flames, sparks. Exposure to water/moisture. Extremes of temperature and direct sunlight.
Incompatible Materials:	Water/moisture, oxidizing agents, reducing agents, alkali metals, acid chlorides/anhydrides.
Hazardous Decomposition Products:	Under normal conditions of storage and use, hazardous decomposition products should not be produced. Hazardous decomposition products include organic acid vapors, methanol and titanium oxide. In the event of a fire: see section 5.
Possibility of Hazardous Reactions:	Reacts slowly with moist air and rapidly in contact with water to release methanol.

Section 11. Toxicological Information

Information on Toxicological Effects

Acute Toxicity	: Harmful if ingested, inhaled or in contact with skin.
Irritation/Corrosion	: Causes skin irritation and serious eye damage.
Sensitization	: No specific data available.
Germ Cell Mutagenicity	: No effects known.

Titanium(IV) methoxide

Safety Data Sheet

Section 11. Toxicological Information

Carcinogenicity

- IARC** : No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.
- ACGIH** : No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by ACGIH.
- NTP** : No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by NTP.
- OSHA** : No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by OSHA.

Reproductive Toxicity

- : This product is not expected to cause reproductive or developmental effects.

Teratogenicity

- : No specific data available.

Specific Target Organ Toxicity (single exposure)

- : Inhalation – May cause respiratory tract irritation.

Specific Target Organ Toxicity (repeated exposure)

- : No specific data available.

Aspiration Hazard

- : No specific data available.

Information on the likely routes of exposure

- : No specific data available.

Additional Information

- : Ingestion of the product may be fatal or cause blindness due to the release of methanol from product hydrolysis.

To the best of our knowledge, the chemical, physical and toxicological properties of this product have not been thoroughly investigated.

Section 12. Ecological Information

Numerical Measures of Toxicity

- Toxicity to Fish** : No specific data available.

- Toxicity to daphnia and other aquatic invertebrates** : No specific data available.

- Toxicity to algae** : No specific data available.

Persistence and Degradability

- Biodegradability** : No specific data available.

- Bioaccumulative potential** : No specific data available.

Titanium(IV) methoxide

Safety Data Sheet

Section 12. Ecological Information

- Mobility in soil** : No specific data available.
- Other Adverse Effects** : An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Section 13. Disposal Considerations

Waste Treatment Methods

- Product** Dispose of in accordance with local, state, and federal regulations. Refer to 40 CFR 260-299 for complete waste disposal regulations. Consult your local, state, or federal agency before disposing of any chemicals.
- Contaminated packaging** Empty containers retain product residue (dusts, aerosols, vapors, gases) and can be dangerous. DO NOT EXPOSE SUCH CONTAINERS TO MOISTURE, HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION; THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

Section 14. Transport Information

	DOT	IMDG	IATA
UN Number	UN 1325	UN 1325	UN 1325
UN Proper Shipping Name	Flammable solids, organic, n.o.s. (Titanium methoxide)	FLAMMABLE SOLIDS, ORGANIC, N.O.S. (Titanium methoxide)	Flammable solids, organic, n.o.s. (Titanium methoxide)
Transport Hazard Classes	4.1	4.1	4.1
Packing Group	II	II	II
Environmental Hazards	No	No	No
Additional Information	-	EMS-No: F-A, S-G	-

- Special Precautions for User** : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.
- Transporting in Bulk According to Annex II of MARPOL 73/78 and the IBC Code** : Not applicable.

Titanium(IV) methoxide

Safety Data Sheet

Section 15. Regulatory Information

TSCA (Toxic Substance Control Act):

This product is listed on the U.S. Toxic Substances Control Act Chemical Inventory (TSCA Inventory).

SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

SARA 311/312 Hazards

Fire Hazard (Flammable Solid), Acute Health Hazard (Acute toxicity – ingestion, dermal, inhalation; Skin corrosion or irritation; Serious eye damage or eye irritation; Specific target organ toxicity, single exposure: respiratory irritation).

Massachusetts Right to Know Components

No components are subject to Massachusetts Right to Know Act.

Pennsylvania Right to Know Components

No components are subject to Pennsylvania Right to Know Act.

New Jersey Right to Know Components

No components are subject to New Jersey Right to Know Act.

California Proposition 65 Components

This product does not contain any chemicals known to State of California to cause cancer, birth defects, or any other reproductive harm.
