

SAFETY DATA SHEET

Section 1. Identification

| | |
|--|--|
| Product Name: | Bis(pentafluorophenyl)zinc |
| Product Type: | Solid. |
| CAS Number: | 1799-90-2 |
| Product Number: | ZN9902 |
| Product Manufacturer: | Ereztech LLC 11555 Medlock Bridge Road, Suite 100 Johns Creek, GA 30097 |
| Product Information: | (888) 658-1221 |
| <u>In case of an emergency:</u> | CHEMTREC: 1-800-424-9300 (USA); +1 703-527-3887 (International); CCN836180 *** Contact manufacturer for all non-emergency calls. |

Section 2. Hazards Identification

Emergency Overview

Appearance/Odor: Solid, color and odor not determined.

Classification: Not a hazardous substance.

GHS label elements

Signal word: None.

Hazard statements: None.

Hazard pictograms: None.

Precautionary statements

Prevention: P264: Wash skin thoroughly after handling.

Response: P312: Call a POISON CENTER or doctor/physician if you feel unwell.

Disposal: P501: Dispose of contents/ container to an approved wasted disposal plant.

OSHA/HCS status: This material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Hazards not otherwise classified: None.

Bis(pentafluorophenyl)zinc

Safety Data Sheet

Section 3. Composition/Information on Ingredients

Substances

| | |
|------------------|---|
| Formula | : C ₁₂ F ₁₀ Zn |
| Synonyms | : zinc,1,2,3,4,5-pentafluorobenzene-6-ide |
| Molecular weight | : 399.50 g/mol |
| CAS-No. | : 1799-90-2 |

| Ingredient Name | % | CAS Number |
|----------------------------|-----|------------|
| Bis(pentafluorophenyl)zinc | >97 | 1799-90-2 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First Aid Measures

Description of Necessary First Aid Measures

| | |
|------------------------|---|
| General Advice: | Move out of dangerous area. Show this safety data sheet to the doctor in attendance. |
| Eye Contact: | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue rinsing. |
| Skin Contact: | Wash off contaminated skin with soap and plenty of water. |
| Inhalation: | Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Ingestion: | Rinse mouth. Remove dentures if any. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

Most Important Symptoms/Effects, Acute And Delayed Potential Acute Health Effects

| | |
|----------------------|---------------------------|
| Eye Contact: | No information available. |
| Inhalation: | No information available. |
| Skin Contact: | No information available. |
| Ingestion: | No information available. |

Indication of Immediate Medical Attention and Special Treatment Needed, If Necessary

Notes to Physician: Treat symptomatically.

Bis(pentafluorophenyl)zinc

Safety Data Sheet

Section 4. First Aid Measures

| | |
|--|---|
| Specific Treatments: | No specific treatment. |
| Protection of First Responders: | No action taken shall be taken involving any personal risk without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

See toxicological information (Section 11)

Section 5. Fire Fighting Measures

| | |
|--|---|
| General Hazards: | None identified. |
| Suitable Extinguishing Media: | THE MOST EFFECTIVE FIRE EXTINGUISHING AGENT IS DRY CHEMICAL POWDER PRESSURIZED WITH NITROGEN. Vermiculite, sand, dry chemical or carbon dioxide (CO ₂) may also be used. |
| Unsuitable Extinguishing Media: | DO NOT USE WATER OR FOAM as product reacts to produce hydrogen fluoride upon contact with water |
| Unusual Fire and Explosion Hazards: | None identified. |
| Product of Combustion: | If involved in a fire, this product will produce carbon oxides (CO _x), zinc oxides, and hydrogen fluoride. |
| Protection of Firefighters: | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Avoid contact with skin or eyes. Avoid breathing dust, aerosols, vapors and gases. Fire-fighters should wear appropriate protection equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in a positive pressure mode. |

Section 6. Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures

| | |
|-------------------------------------|--|
| For Non-emergency Personnel: | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid dust and aerosol formation. Avoid inhalation of dusts and aerosols. Provide adequate ventilation. Wear respiratory protection. Put on appropriate personal protective equipment. |
|-------------------------------------|--|

Bis(pentafluorophenyl)zinc

Safety Data Sheet

Section 6. Accidental Release Measures

- For Emergency Responders:** If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel".
- Environmental Precautions:** Do not allow dispersal of spilled material and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods for Containment

- Small/Large Spill:** Move containers from spill area if safe to do so. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid the formation of dusts or aerosols. Avoid all contact with dusts and aerosols. Contain and collect spillage with an inert binding material (e.g. sand, earth, vermiculite or diatomaceous earth) and place in a sealed container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.
- Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and Storage

- Precautions:** Avoid contact with skin, eyes and clothing. Avoid formation and inhalation of dusts and aerosols. Do not ingest. Provide adequate ventilation.
- Protective Measures:** Put on appropriate personal protective equipment (see Section 8). Keep in the original container kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
- General Occupational Hygiene:** Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Bis(pentafluorophenyl)zinc

Safety Data Sheet

Section 8. Exposure Controls/Personal Protection

| | |
|---|---|
| Safe Storage Conditions: | Store in original container in a dry, cool and well-ventilated area, away from incompatible materials (strong oxidizing agents) and food and drink. Keep container tightly closed and sealed until ready for use. |
| Introductory Remarks: | These recommendations provide general guidance for handling this product. Because work environments and material handling practices vary, safety procedures should be developed for each intended application. While developing safe handling procedures, do not overlook the need to clean equipment and conduct regular repairs. Waste from these procedures should be handled in accordance with Section 13. |
| Occupational Exposure Limits: | Product contains no substances with occupational exposure limit values. |
| Engineering Controls: | Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Provide an eyewash/shower station. |
| Environmental Exposure Controls: | Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. |

Individual Protection Measures

| | |
|-----------------------------|--|
| Hygiene Measures: | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Remove all soiled and contaminated clothing immediately. Do not inhale dusts or aerosols. Avoid contact with eyes and skin. Ensure that eyewash stations and safety showers are close to the workstation location. |
| Eye/Face Protection: | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to aerosols or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles, faceshield (8-inch minimum). Refer to 29 CFR 1910.133, ANSI Z87.1, or European Standard EN166. |

Bis(pentafluorophenyl)zinc

Safety Data Sheet

Section 8. Exposure Controls/Personal Protection

Skin Protection

Hand Protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: Chemical-resistant gloves. For full contact, wear Neoprene or nitrile rubber gloves.

Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Other Skin Protection:

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory Protection:

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multipurpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Section 9. Physical and Chemical Properties

Physical State:

Solid.

Color:

No data available.

Odor:

No data available.

Odor Threshold:

No data available.

pH:

No data available.

Melting Point:

100 - 105 °C (212 - 221 °F).

Bis(pentafluorophenyl)zinc

Safety Data Sheet

Section 9. Physical and Chemical Properties

| | |
|------------------------------|--------------------|
| Boiling Point: | No data available. |
| Flash Point: | No data available. |
| Flammability (solid): | No data available. |
| Relative Density: | No data available. |
| Vapor Pressure: | No data available. |
| Vapor Density: | No data available. |
| Water Solubility: | No data available. |
| VOC Content: | No data available. |

VOCs are calculated following the requirements under 40 CFR, Part 59, Subpart C for Consumer Products and Subpart D for Architectural Coatings.

Section 10. Stability and Reactivity

| | |
|--|--|
| Reactivity: | No specific data available. |
| Chemical Stability: | Stable at normal ambient temperature and pressure and under recommended storage conditions. |
| Conditions to Avoid: | None identified. |
| Incompatible Materials: | Strong oxidizing agents. |
| Hazardous Decomposition Products: | Under normal conditions of storage and use, hazardous decomposition products should not be produced. Hazardous decomposition products formed under fire conditions: carbon oxides (CO _x), hydrogen fluoride and zinc oxide fumes. In the event of a fire: see section 5. |
| Possibility of Hazardous Reactions: | Under normal conditions of storage and use noted above, hazardous reactions will not occur. Hazardous reactions or instability may occur under certain conditions of storage or use. |

Section 11. Toxicological Information

Information on Toxicological Effects

| | |
|-------------------------------|---|
| Acute Toxicity | : No specific data available. |
| Irritation/Corrosion | : No specific data available. |
| Sensitization | : No specific data available. |
| Germ Cell Mutagenicity | : No effects known. |
| Carcinogenicity | |
| IARC | : No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by IARC. |

Bis(pentafluorophenyl)zinc

Safety Data Sheet

Section 11. Toxicological Information

| | |
|---|--|
| ACGIH | : No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by ACGIH. |
| NTP | : No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by NTP. |
| OSHA | : No component of this product present at levels greater than 0.1% is identified as probable, possible or confirmed human carcinogen by OSHA. |
| Reproductive Toxicity | : This product is not expected to cause reproductive or developmental effects. |
| Teratogenicity | : No specific data available. |
| Specific Target Organ Toxicity (single exposure) | : No specific data available. |
| Specific Target Organ Toxicity (repeated exposure) | : No specific data available. |
| Aspiration Hazard | : No specific data available. |
| Information on the likely routes of exposure | : No specific data available. |
| Additional Information | : May be harmful if inhaled, ingested or in contact with skin. |

To the best of our knowledge, the chemical, physical and toxicological properties of this product have not been thoroughly investigated.

Section 12. Ecological Information

Numerical Measures of Toxicity

| | |
|--|---|
| Toxicity to Fish | : No specific data available. |
| Toxicity to daphnia and other aquatic invertebrates | : No specific data available. |
| Toxicity to algae | : No specific data available. |
| Persistence and Degradability | |
| Biodegradability | : No specific data available. |
| Bioaccumulative potential | : No specific data available. |
| Mobility in soil | : No specific data available. |
| Other Adverse Effects | : An environmental hazard cannot be excluded in the event of unprofessional handling or disposal. |

Bis(pentafluorophenyl)zinc

Safety Data Sheet

Section 13. Disposal Considerations

Waste Treatment Methods

Product

Dispose of in accordance with local, state, and federal regulations. Refer to 40 CFR 260-299 for complete waste disposal regulations. Consult your local, state, or federal agency before disposing of any chemicals.

Contaminated packaging

Empty containers retain product residue (dusts and/or vapor) and can be dangerous.

Section 14. Transport Information

| | DOT | IMDG | IATA |
|--------------------------|---------------|---------------|---------------|
| UN Number | Not regulated | Not regulated | Not regulated |
| UN Proper Shipping Name | - | - | - |
| Transport Hazard Classes | - | - | - |
| Packing Group | - | - | - |
| Environmental Hazards | - | - | - |
| Additional Information | - | - | - |

Special Precautions for User

: Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transporting in Bulk According to Annex II of MARPOL 73/78 and the IBC Code

: Not applicable.

Section 15. Regulatory Information

TSCA (Toxic Substance Control Act):

This product is not listed on the U.S. Toxic Substances Control Act Chemical Inventory (TSCA Inventory). Use of this product is restricted to research and development only. This product must be used under the supervision of a technically qualified individual as defined by the TSCA. This product must not be used for commercial purposes or in formulations for commercial purposes.

SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

Bis(pentafluorophenyl)zinc

Safety Data Sheet

Section 15. Regulatory Information

SARA 311/312 Hazards

No SARA hazards.

Massachusetts Right to Know Components

No components are subject to Massachusetts Right to Know Act.

Pennsylvania Right to Know Components

No components are subject to Pennsylvania Right to Know Act.

New Jersey Right to Know Components

No components are subject to New Jersey Right to Know Act.

California Proposition 65 Components

This product does not contain any chemicals known to State of California to cause cancer, birth defects, or any other reproductive harm.
